Alfred,2007-02-13 What has plasma and dark matter got to do with your afterlife In 2005 Jay proposed that dark matter which comprises about 85 per cent of the matter in the universe could include self interacting dark plasma Subsequently this proposal received support in the scientific literature This has significant implications not only for the universe as a whole but also planet Earth and its inhabitants In recent years scientists have pointed out to the life like characteristics of plasma How has this life like dark plasma participated in human evolution Does dark plasma provide the physical basis for your afterlife Do we have plasma bodies which co evolved endosymbiotically with our ordinary matter bodies but are currently invisible to us This book explores this in detail while adhering to experimental data with some surprising conclusions Highlighted readers comments I have read several books over the years on this theme of correlating science with spirit They include The Tao of Physics and more recently The Divine Matrix This masterpiece by Jay Alfred however is one of the best because it explores deeper and more passionately than the others A riveting read and in my opinion this book should be a best seller There s nothing parapsychological paranormal about it we just haven t had the science to explain it until now I ve been reading all three of Jay Alfred s books and so far I ve seriously enjoyed all of them I actually haven t been able to put them down The first few pages are worth the price of this book **Awakening at Midlife** Kathleen A.
