Alzheimer's Disease Life-Writing Martina Zimmermann,2017-06-07 This book is open access under a CC BY 4 0 license This
 is the first book length exploration of the thoughts and experiences expressed by dementia patients in published narratives
 over the last thirty years It contrasts third person caregiver and first person patient accounts from different languages and a
 range of media focusing on the poetical and political questions these narratives raise what images do narrators appropriate
 what narrative plot do they adapt and how do they draw on established strategies of life writing It also analyses how these
 accounts engage with the culturally dominant Alzheimer s narrative that centres on dependence and vulnerability and
 addresses how they relate to discourses of gender and aging Linking literary scholarship to the medico scientific
 understanding of dementia as a neurodegenerative condition this book argues that first patients articulations must be made
 central to dementia discourse and second committed alleviation of caregiver burden through social support systems and
 altered healthcare policies requires significantly altered views about aging dementia and Alzheimer s patients **J. Bernlef**
