historiography *Modernity, Metatheory, and the Temporal-Spatial Divide* Michael Kimid, 2015-03-27 This book is about how modernity affects our perceptions of time and space Its main argument is that geographical space is used to control temporal progress by channeling it to benefit particular political economic and social interests or by halting it altogether By incorporating the ancient Greek myth of the Titanomachy as a conceptual metaphor to explore the elemental ideas of time and space the author argues that hegemonic interests have developed spatial hierarchy into a comprehensive system of technocratic monoculture which interrupts temporal development in order to maintain exclusive power and authority This spatial stasis is reinforced through the control of historical narratives and geographical settings While increasingly comprehensive the author argues that this state of affairs can best be challenged by focusing on the development of unmappable places which presently exist within the socio spatial matrix of the modern world **What is a Classic in**

AbdulHarnid A. AbiiSulaymiin, Ghulam-Haider Aasi, Khalid Blankinship, Ola Abdel-Kawi and James f i l e, Hassan Elhag Ali, Dilnawaz A. Siddiqui, Larry Poston, The American Journal of Islamic Social Sciences AJISS established in 1984 is a quarterly double blind peer reviewed and interdisciplinary journal published by the International Institute of Islamic Thought IIIT and distributed worldwide The journal showcases a wide variety of scholarly research on all facets of Islam and the Muslim world including subjects such as anthropology history philosophy and metaphysics politics psychology religious law and traditional Islam *Diverging Time* David Carvounas, 2002-01-01 Temporal divergence creates a need for new

narratives and paradigms In *Diverging Time* David Carvounas supports this assertion through detailed expository and diagnostic readings of Kant Hegel and Marx He focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present Despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose This book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that Kant Hegel and Marx delineate in distinctive and powerful ways

[History, Historians, and the Dynamics of Change](#) William A. Green, 1993-02-22 Green offers a remarkably lucid erudite and insightful description and analysis of the theoretical foundations of modern historical writing He is the first to provide an orderly introduction to the several systematic models by which leading modern historians have attempted to explain continuity and change This cogent survey is essential to an understanding of modern Western historiography The book introduces history as a theoretical discipline Green examines the many pitfalls of historical writing and demonstrates that historical truth is a most elusive quarry He addresses periodization the manner in which past time is divided showing how

prevailing modes of periodization have evolved in the West Part two of the book is concerned with the dynamics of change in European history Each chapter considers a specific theoretical orientation including the commercial model initiated by Adam Smith and pursued by Henri Pirenne and others the demographic model first formulated by Malthus the Marxian model or models and the approaches of Weber and Sombart who identified religious forces as the chief engines of historical change Part three addresses models of change being employed in world history particularly the world system approach of Frank and Wallerstein and the creative orientations of environmental historians In his conclusion Green returns to the question of whether the theoretical models of change currently in use among historians are consistent with contemporary modes of periodization The bibliography is extensive

**The Social Circulation of the Past** Daniel R. Woolf, 2003 This book investigates the changing historical culture in England between the beginning of the sixteenth century and the early eighteenth century Based on a wide variety of manuscript and printed sources from local and central repositories it focuses on the social framework within which historical knowledge was generated modified and preserved rather than on historiography or historical method Woolf begins his study by examining the ways in which early modern people acclimatized themselves to accelerating changes in their physical social religious and economic environments A developing if uneasy accommodation to change went hand in hand with shifting attitudes to the acceptability of novelty and innovation The family was the central social unit throughout most of this time and Woolf examines views of ancestry and heredity with a particular emphasis on the circulation of genealogical knowledge and its status relative to other forms of knowledge about the past The third part of the book turns to the subject of antiquarianism investigating the relationship between the many varieties of antiquarian activity which focused on a visible and tangible past and the emergence of a visual sense of history during the seventeenth century It is argued that artefacts ranging from fossils to funeral urns were exchanged in an archaeological economy among local discoverers of antiquities most of whom were of humble station local gentry and clergy and university or London based antiquaries It is through the force and volume of this type of exchange rather than the scholarly contributions of particular authors that England became much more historically aware by the early eighteenth century The fourth and final part takes this line of argument in a different direction analysing the study of recollections and memories of the past Beginning with an examination of the place of memory in English life generally Woolf argues that memory as a faculty existed in tension with writing for instance with the emergence of a much more record orientated local archival system The growing quantity of published historical material had considerable impact on community memories of the past threatening to overwhelm the latter with an emerging national master narrative of history At the same time local communities managed to preserve a rich variety of beliefs about their surroundings beliefs that testify to the strength of connection between oral and literate expression and popular and elite cultures However oral modes of transmission highly attractive to early Tudor antiquaries were regarded with suspicion by early seventeenth century scholars because of their

vagueness and undocumentability This scepticism was complemented by a deepening social hostility toward vulgar error and the lower orders with which much of it was not always correctly associated By the early eighteenth century oral tradition was no longer a legitimate tool of the antiquary or the historian though certain scholars began to preserve it as folklore in which form it would be studied anew in the nineteenth and twentieth centuries In conclusion Woolf argues that sweeping changes in the perception of the past and the understanding of its place in social life occurred during this period producing a historical culture which was qualitatively different from that which had existed at the end of the fifteenth century It is against this culture that the formal historical writing of the age must be understood and it is from it that eighteenth and nineteenth century historical writing as well as related genres such as the historical novel would emerge Decoding Clausewitz Jon Tetsuro Sumida,2008 A pathbreaking critique of the thought of military studies icon Carl Phillip Gottfried von Clausewitz and his magnum opus *On War* that illuminates why and how that work should be viewed as much more mature coherent innovative and complete than suggested by previous accounts **Voices from Captivity** Robert C. Doyle,1994 Doyle shows that though setting and circumstances may change POW stories share a common structure and are driven by similar themes Capture incarceration isolation propaganda torture capitulation or resistance death spiritual quest escape liberation and repatriation are recurrent key motifs in these narratives *Minnesota Law Review* ,1998 **Postmodernism and a Sociology of the Absurd and Other Essays on the "nouvelle Vague" in American Social Science** Stanford M. Lyman,1997 In the fifth volume in the Studies in American Sociology Series Stanford M Lyman offers commentaries on and critiques of postmodernism poststructuralism and deconstruction posing questions concerning theoretical and epistemological problems arising from what appears to be a nouvelle vague Postmodernism poststructuralism and deconstructionism are interrelated aspects of the newest theoretical development in sociology and the social sciences This new wave of thought challenges virtually all paradigms currently in use In this his fifth volume in the Studies in American Sociology Series Stanford M Lyman offers commentaries on and critiques of this new perspective posing questions concerning theoretical and epistemological problems arising from what appears to be a nouvelle vague Among the basic themes and issues explored are the allegation that modernity has defaulted on the promise of the Enlightenment the question of whether the rational basis for knowledge and action is still valid the controversy over the place of metanarratives and macrosociological outlooks and newer concerns over race gender sexual preferences the self and the Other Professor Lyman provides empirically based and historically specific analyses of the relation of the race question to the problem of otherness and to the legal construction of racial identity in American court proceedings Focusing on the issues of citizenship affecting European Middle Eastern and Asian immigrants African Americans and the special cases of the Chinese and Native Americans he relates major public problems to the modern as well as the postmodern perspectives on justice The debate over assimilation and multiculturalism the dynamics of gender specific emotions as expressed in six decades of Hollywood films

and the postmodern approach to deviance are each examined He also offers proposals for a social science attuned to but critical of postmodernism and poststructuralism Such a sociology might offer a perspective that treats the drama of social relations in the routine as well as the remarkable aspects of everyday life Professor Lyman provides not only a new understanding of postmodernism but also a program of how to proceed with respect to its challenges The Western Historical Quarterly ,1989 **Theory of History in Ortega Y Gasset** John Thomas Graham,1997 Following upon Graham s first volume A Pragmatist Philosophy of Life in Ortega y Gasset this one examines Ortega s instrumentalist approach to history which also reflects pragmatist thought of William James and John Dewey in a realist use of general models to formulate a kind of theoretical schematic history culminating in an unfinished twenty year project The Dawn of Historical Reason Lagos Historical Review ,2001 **Writing Asia: From the inside, Asia-Pacific literatures in Englishes** ,2007
