The Traveling Salesman Problem A Linear Programming:

The Traveling Salesman Problem David L. Applegate, 2006 Presents the findings on one of the most intensely investigated subjects in computational mathematics the travelling salesman problem This book describes the method and computer code used to solve a range of large scale problems and demonstrates the interplay of applied mathematics with increasingly powerful computing platforms

A Linear Programming Approach for the Traveling Salesman Problem Saman Hong, 1972

On a Linear-programming-combinatorial Approach to the Traveling-salesman Problem: Notes on Linear Programming and Extensions-part 49 George Bernard Dantzig, 1959 A demonstration that the linear programming combinatorial approach wherein simplex multipliers are used in a combinatorial analysis of undominated tours at some stage of the linear programming approach affords a practical way of solving traveling salesman problems

The Traveling Salesman Problem and the Subtour Linear Programming [], 2017

The Traveling Salesman Gerhard Reinelt, 2003-08-02 Still today I am receiving requests for reprints of the book but unfortunately it is out of print Therefore since the book still seems to receive some attention I proposed to Springer Verlag to provide a free online edition I am very happy that Springer agreed Except for the correction of some typographical errors the online edition is just a copy of the printed version no updates have been made In particular Table 13.1 gives the status of TSPLIB at the time of publishing the book For accessing TSPLIB the link <http://www.iwr.uni-heidelberg.de/iwr/comopt/software/TSPLIB95> should be used instead of following the procedure described in Chapter 13 Heidelberg January 2001 Gerhard Reinelt Preface More than fifteen years ago I was faced with the following problem in an assignment for a class in computer science A brewery had to deliver beer to n stores and the task was to write a computer program for determining the shortest route for the truck driver to visit all stores and return to the brewery All my attempts to find a reasonable algorithm failed I could not help enumerating all possible routes and then select the best one

The Traveling Salesman Problem David L. Applegate, Robert E. Bixby, Vašek Chvátal, William J. Cook, 2011-09-19 This book presents the latest findings on one of the most intensely investigated subjects in computational mathematics the traveling salesman problem It sounds simple enough given a set of cities and the cost of travel between each pair of them the problem challenges you to find the cheapest route by which to visit all the cities and return home to where you began Though seemingly modest this exercise has inspired studies by mathematicians chemists and physicists Teachers use it in the classroom It has practical applications in genetics telecommunications and neuroscience The authors of this book are the same pioneers who for nearly two decades have led the investigation into the traveling salesman problem They have derived solutions to almost eighty six thousand cities yet a general solution to the problem has yet to be discovered Here they describe the method and computer code they used to solve a broad range of large scale problems and along the way they demonstrate the interplay of applied mathematics with increasingly powerful computing platforms They also give the fascinating history of the problem how it developed and why it continues to intrigue us

The

Traveling Salesman Problem and Its Variations G. Gutin,A.P. Punnen,2006-05-02 A brilliant treatment of a knotty problem in computing This volume contains chapters written by reputable researchers and provides the state of the art in theory and algorithms for the traveling salesman problem TSP The book covers all important areas of study on TSP including polyhedral theory for symmetric and asymmetric TSP branch and bound and branch and cut algorithms probabilistic aspects of TSP and includes a thorough computational analysis of heuristic and metaheuristic algorithms On a Linear Programming-combinatorial Approach to the Traveling Salesman Problem George Bernard Dantzig,D. Approximation Algorithms for Traveling Salesman Problems Based on Linear Programming Relaxations Hyung Chan An,2012 The traveling salesman problem TSP is the problem of finding a shortest Hamiltonian circuit or path in a given weighted graph This problem has been studied in numerous variants and linear programming has played an important role in the design of approximation algorithms for these problems In this thesis we study two versions of the traveling salesman problem and present approximation algorithms for them based on the Held Karp relaxation We first investigate the s t path TSP Hoogeveen showed that the natural variant of Christofides algorithm is a $5/3$ approximation algorithm for this problem this asymptotically tight bound had remained the best approximation ratio known until now We surpass this 20 year old barrier by presenting a deterministic 1.5 approximation algorithm for the s t path TSP for an arbitrary metric The techniques devised in this context can also be applied to other optimization problems including the prize collecting s t path problem and the unit weight graphical metric s t path TSP The integrality gaps of the LP relaxations for all three problems are studied Then we consider the bottleneck asymmetric TSP where the objective is minimizing the bottleneck or maximum length edge cost rather than the total edge cost We present the first nontrivial approximation algorithm for this problem by giving a novel algorithmic technique to shortcut Eulerian circuits while bounding the lengths of the shortcuts needed Building on this framework and the result of Asadpour Goemans Madry Oveis Gharan and Saberi we achieve an $O(\log n \log \log n)$ approximation algorithm We also explore the possibility of improvement upon this result through a comparison to the symmetric counterpart of the problem
