The Grant Center for Outdoor Education gives student groups experience in studying nature and helping to restore the environment for fish, birds, and animals. The number of seedling trees that can be planted in one day depends on the number of students in the work group. Data from several different work groups is shown in the next graph. Draw a line that best fits the pattern in [workers, trees] data.

Answer the following questions on a separate sheet of paper.

1. Estimate how many trees will be planted by a work crew of 14. Explain how you find your answer.
2. Estimate how many workers will be required to plant 500 trees. Explain how you find your answer.
3. Write an equation for the graph model relating trees planted to number of workers.
4. What does that slope tell about the relationship between the variables?
