Kim Hastreiter, 2015-05-14 1994 northern California The Internet is just emerging from its origins in the military and university research labs Groups of idealistic technologists recognizing its potential as a tool for liberation and solidarity are working feverishly to build the network In the early chat rooms of one such gathering soon to become famous as The WELL a Stanford futurist named Tom Mandel creates a new conference In a topic headed Local Bug Report he asks for advice from fellow online participants about how he might shake off a persistent hacking cough A few weeks into the conversation it emerges that Mandel's illness is something serious Within six months he is dead This astonishing and deeply moving book is an edited version of the exchanges that took place on The WELL in the months leading up to the death of Mandel It traces the way an innocuous health topic morphed into a dramatic chronicle of terminal illness and the complicated and emotional issues that surrounded it A cast of articulate and savvy participants offer their advice and love to Mandel supporting both him and each other as the trauma unfolds At the center of their back and forth is Mandel himself in a voice that is irascible intelligent never sentimental and above all determined to stay in the conversation to the end With an introduction by Paper editor Kim Hastreiter who followed the exchanges on The WELL as they happened and was so moved that she printed and filed away a copy heaven opens a window onto the way the Internet functioned in its earliest days In contrast to the trolling

and take downs of today s online discourse this electronic chronicle of a death foretold reminds us of the values of kinship and community that the Internet s early pioneers tried to instill in a system that went on to take over the world

Surveillance Valley Yasha Levine,2018-02-06 The internet is the most effective weapon the government has ever built In this fascinating book investigative reporter Yasha Levine uncovers the secret origins of the internet tracing it back to a Pentagon counterinsurgency surveillance project A visionary intelligence officer William Godel realized that the key to winning the war in Vietnam was not outgunning the enemy but using new information technology to understand their motives and anticipate their movements This idea using computers to spy on people and groups perceived as a threat both at home and abroad drove ARPA to develop the internet in the 1960s and continues to be at the heart of the modern internet we all know and use today As Levine shows surveillance wasn t something that suddenly appeared on the internet it was woven into the fabric of the technology But this isn t just a story about the NSA or other domestic programs run by the government As the book spins forward in time Levine examines the private surveillance business that powers tech industry giants like Google Facebook and Amazon revealing how these companies spy on their users for profit all while doing double duty as military and intelligence contractors Levine shows that the military and Silicon Valley are effectively inseparable a military digital complex that permeates everything connected to the internet even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden With deep research skilled storytelling and provocative arguments Surveillance Valley will change the way you think about the news and the device on which you read it
