financial engineering and revolutions Realising that most of the texts on business and financial risk management are research are subject specific regardless of the fact that most financial and investment methods and approaches today are contingent complementary and overlapping the book advances the argument that its high time that researchers consider coming up and applying research texts that are multi disciplinary and promoting interactions across related fields The richness and novelty of the book is premised on its attempt to offer business and financial risks all in one book which can be applied to different disciplines and situations More significantly and without overrating the potential of multi disciplinary research approaches the book provides additional insights and dimensions on origins evolutions and trends emerging in contemporary research The book is therefore bringing an important contribution to contemporary research debates and multi disciplinary discourses that have taken centre stage in recent years in many universities and across the world in dissemination of knowledge aimed at turning the fortunes of modern businesses towards effective risk management and growth towards sustainable development The book is critically important to students and practitioners across fields and let alone businesses that are struggling to grow and develop due to weak risk management systems poor corporate governance and ethics frameworks

The Gulf Cooperation Council States Yousef Khalifa Al-Yousef, 2017-02-27 Since the oil boom of the 1970s the

Gulf Cooperation Council States have attempted to achieve economic stability and realise their development goals. Such efforts have so far been in vain however as these states autocratic governments have closed off their political systems with the support of international allies especially the United States. In this timely and exhaustive analysis of the political economies of the GCC since the 1970s to the present Yousef Khalifa Al Yousef examines the factors responsible for the failure of the states to achieve lasting change in development and security. Focusing on institutional structures where oil wealth has been confined to the few and the consequences of failed legitimacy at home that has led to dependence on foreign powers Al Yousef charts the consistent disparities between governance and the needs of the local population to the detriment of genuine development. Al Yousef concludes that the only way to ensure stability and growth in the region is to dismantle the alliance of autocracy oil and foreign powers. Instead democracy and reform are key to ensuring stability in the region.
