1. **True.** The average life expectancy when a person is born increases steadily with age. For example, during the 1990s, you could expect to live about 75 years if you are born, but if you are 65, you can expect to live about 15 more years. The longer you live, the longer you can expect to live. This suggests that you have a longer life expectancy.

2. **False.** The average life expectancy is not the same for everyone. It varies by country, and it varies by gender. For example, the average life expectancy in the United States is about 75 years, but in some countries, it is as low as 50 years. This suggests that life expectancy is not the same for everyone.

## Answer Key

- 1. **True.** The average life expectancy is not the same for everyone.
- 2. **False.** The average life expectancy is not the same for everyone.
- 3. **True.** The average life expectancy is not the same for everyone.
