mineral exploration leading to the discovery of new ore deposits and products is one of the most important forces helping to fend off depletion. in section 1 the fundamentals and aims of mineral exploration are briefly introduced. in section 2 the characteristics and formative processes of mineral deposits are described for geologic prospecting.

*geological methods in mineral exploration and mining* - Feb 14 2023

this practical step by step guide describes the key geological field techniques needed by today's exploration geologists involved in the search for metallic deposits. the techniques described are fundamental to the collection, storage and presentation.

**drilling a general discussion the importance of drilling** - Jun 06 2022

jan 1 2010 abstract drilling is one of the most important and can be the most expensive of all mineral exploration.

procedures in almost all cases it is drilling that locates and defines economic mineralization and drilling provides the ultimate test for all the ideas theories and predictions that are generated in the preceding prospect generation
