

# Online Movie Ticket Booking System Documentation

## 1. Introduction

Welcome to the documentation for our Online Movie Ticket Booking System. This system is designed to facilitate the booking of movie tickets through an online platform, providing users with convenience and flexibility in selecting seats, showtimes, and movies. This document serves as a comprehensive guide for users, administrators, developers, and testers to understand the functionalities, architecture, and usage of the system.

## 2. System Overview

Our Online Movie Ticket Booking System enables users to browse movies, view showtimes, select seats, and make bookings from the comfort of their homes or on the go. The system caters to both registered users and guests, offering a seamless booking experience. Administrators have access to backend functionalities for managing movies, showtimes, and user bookings.

## 3. System Architecture

The system follows a client-server architecture:

- **Frontend:** Developed using HTML, CSS, and JavaScript frameworks such as React.js. The frontend provides an intuitive user interface for browsing movies, selecting seats, and making bookings.
- **Backend:** Built using Node.js and Express.js, the backend serves as the middleware between the frontend and the database. It handles authentication, business logic, and database interactions.
- **Database:** Utilizes a relational database management system (e.g., MySQL, PostgreSQL) to store data such as user profiles, movie details, showtimes, bookings, and seat availability.

## 4. Functional Requirements

- **User Registration:** Users can create accounts by providing necessary details such as email, password, and personal information.
- **User Authentication:** Registered users can securely log in to their accounts using email and password authentication.
- **Browsing Movies:** Users can browse through a list of available movies, sorted by genres, release dates, or popularity.

Douglas A. Gentile,2014-09-30 Stripping away the hype this book describes how when and why media violence can influence children of different ages giving parents and teachers the power to maximize the media s benefits and minimize its harm There are many opinions about media violence and children but not all are supported by science In this book the top

experts gather the latest results from 50 years of scientific study as the basis for a comprehensive in depth examination of the complex issues surrounding the effects of media violence of different types Each chapter focuses on a particular issue of concern including hot topics such as brain development cyber bullying video games and verbal aggression Articles take into account factors such as economics differences based on the ages of children and differences between types of media violence This book provides the information parents and those who work with families need to make the best choices It includes chapters specifically relevant to the types of bullying schools have the most trouble identifying and controlling Most importantly the writing is both intelligent and accessible so that parents educators pediatricians and policymakers can understand and apply the findings presented
