Nanoparticles Henning Wigger, 2017-01-09 In this thesis a prospective approach was developed to identify and to assess current as well as potentially upcoming product applications with focus on environmental releases and exposures of engineered nanomaterials The developed product application scenarios were illustrated in case studies on iron oxide and silver nanoparticles It was shown that despite of prevailing knowledge gaps reasonable estimations for environmental releases and exposures can be made This novel approach facilitates the identification of early indicators for precautionary risk management measures and among them benign by design concepts in technology and product development George Nelson Stanley Abercrombie, 1995 George Nelson 1908 1986 a pioneering modernist ranks with Raymond Loewy Charles

Eames and Eliot Noyes as one of America's outstanding designers Nelson's office produced some of the twentieth century's canonical pieces of industrial design including the ball clock the bubble lamp and the sling sofa many of which are still in production Nelson also made major contributions to the storage wall the shopping mall the multi media presentation and the open plan office system The author of this definitive biography was given access to Nelson's office archives and personal papers He also interviewed more than 70 of Nelson's friends colleagues employees and clients including the late D J De Pree former head of the Herman Miller Furniture Company and Nelson's chief patron and obtained many previously unpublished images from corporate and private archives

Surviving Technological Innovation in the Pacemaker Industry, 1959-1990 Catherine M. Banbury, 2021-12-12 First published in 1997 this study looks at the aspect of technological innovation that firms must constantly address if they are to remain viable concerns The chapters document key theories and ideas that have played an important role in the evolution of current understanding of how technologies change and how such changes come to be adopted by the market system hypotheses within a specific empirical context namely the pacemaker industry since its commercial beginnings in 1959 until 1990 how the various dependent and independent variables are constructed and finally the results of the empirical analysis

[Rethinking Plastics in Product Design](#) Geoff Isaac, 2025-03-06 This book addresses the urgent need to reduce our use of virgin fossil plastics It provides a framework for designers and manufacturers to re-evaluate their use of plastics and promotes the use of alternative materials with lower environmental impacts Lightweight strong and cheap plastics are often the obvious choice when designing consumer durables but their use is resulting in devastating health and environmental consequences Recycled plastics and bioplastics are often suitable replacements however mechanical and aesthetic differences mean working with these materials is often challenging and expensive In this book Geoff Isaac outlines strategies for developing more environmentally friendly design solutions and provides practical guidance for designers who seek to use plastics more sustainably Chapters include case studies selected from sixty chairs made from renewable plastics as chairs are often developed to showcase the potential of new materials and their suitability for applications across other consumer products The book also features interviews with a range of industry representatives and international designers including Philippe Starck Barber Osgerby Konstantin Grcic Bertjan Pot and Karim Rashid to illustrate recent designs using renewable plastics This book provides an empowering blueprint for designers to make environmentally responsible decisions in today's business landscape
