**Doppler Applications in LEO Satellite Communication Systems** Irfan Ali, Pierino G. Bonanni, Naofal Al-Dhahir, John E. Hershey, 2005-12-06 Doppler Applications in LEO Satellite Communication Systems develops and presents an important class of techniques useful in the construction of little Low Earth Orbit LEO satellite communication systems It centers on the very significant Doppler shift that attends communications through a LEO satellite and shows how this phenomenon can be exploited for an unexpected benefit The techniques taught in the book are expected to be particularly attractive to system engineers because ground based transceivers must generally compensate for the large Doppler component and therefore the necessary receiver processing loops are often already in place and expensed This volume starts with a recounting of the characteristics of a LEO satellite and its orbit The 2nd chapter addresses the LEO orbital geometry and reviews the Doppler effect attending LEO communications Chapter three is focused on the important task of estimating the Doppler at a ground terminal Appropriate signal processing algorithms are reviewed Chapter four is concerned with predicting LEO satellite visibility Chapters five and

six are respectively devoted to the use of the significant LEO Doppler as an aid in a new traffic flow control protocol and as an aid for effecting communications power control The last chapter describes MATLAB based analysis Doppler Applications in LEO Satellite Communication Systems provides a thorough review of the LEO Doppler phenomenon Satellite Communications Systems Gerard Maral, Michel Bousquet, 2011-08-24 Revisions to 5th Edition by Zhili Sun University of Surrey UK New and updated edition of this authoritative and comprehensive reference to the field of satellite communications engineering Building on the success of previous editions Satellite Communications Systems Fifth Edition covers the entire field of satellite communications engineering from orbital mechanics to satellite design and launch configuration and installation of earth stations including the implementation of communications links and the set up of the satellite network This book provides a comprehensive treatment of satellite communications systems engineering and discusses the technological applications It demonstrates how system components interact and details the relationship between the system and its environment The authors discuss the systems aspects such as techniques enabling equipment and system dimensioning and state of the art technology for satellite platforms payloads and earth stations New features and updates for the fifth edition include More information on techniques allowing service provision of multimedia content Extra material on techniques for broadcasting including recent standards DVB RCS and DVB S2 Digital Video Broadcasting Return Channel Satellite and Satellite Version 2 Updates on onboard processing By offering a detailed and practical overview Satellite Communications Systems continues to be an authoritative text for advanced students engineers and designers throughout the field of satellite communications and engineering *Communications Standard Dictionary* Martin Weik, 2012-12-06 Now in its Third Edition the Communications Standard Dictionary maintains its position as the most comprehensive dictionary covering communications technologies available A one of a kind reference this dictionary remains unmatched in the breadth and scope of its coverage and its primary reference for communications computer data processing and control systems professionals **Fiber Optics Standard Dictionary** Martin Weik, 1997-09-30 Fiber Optics Vocabulary Development In 1979 the National Communications System published Technical Information Bulletin TB 79 1 Vocabulary for Fiber Optics and Lightwave Communications written by this author Based on a draft prepared by this author the National Communications System published Federal Standard FED STD 1037 Glossary of Telecommunications Terms in 1980 with no fiber optics terms In 1981 the first edition of this dictionary was published under the title Fiber Optics and Lightwave Communications Standard Dictionary In 1982 the then National Bureau of Standards now the National Institute of Standards and Technology published NBS Handbook 140 Optical Waveguide Communications Glossary which was also published by the General Services Administration as PB82 166257 under the same title Also in 1982 Dynamic Systems Inc Fiberoptic Sensor Technology Handbook co authored and edited by published the this author with an extensive Fiberoptic Sensors Glossary In 1989 the handbook was republished by Optical Technologies Inc It contained the same glossary In 1984 the Institute of
