INTRODUCTION Sun Tzu Wu was a native of the Ch i State His Art of War brought him to the notice of Ho Lu King of Wu Ho Lu said to him I have carefully perused your 13 chapters May I submit your theory of managing soldiers to a slight test Sun Tzu replied You may Ho Lu asked May the test be applied to women The answer was again in the affirmative so arrangements were made to bring 180 ladies out of the Palace Sun Tzu divided them into two companies and placed one of the King s favourite concubines at the head of each He then bade them all take spears in their hands and addressed them thus I presume you know the difference between front and back right hand and left hand The girls replied Yes Sun Tzu went on When I say Eyes front you must look straight ahead When I say Left turn you must face towards your left hand When I say Right turn you must face towards your right hand When I say About turn you must face right round towards your back Again the girls assented The words of command having been thus explained he set up the halberds and battle axes in order to begin the drill Then to the sound of drums he gave the order Right turn But the girls only burst out laughing Sun Tzu said If words of command are not clear and distinct if orders are not thoroughly understood then the general is to blame

Cultural Realism Alastair Iain Johnston, 2020-05-05 Cultural Realism is an in depth study of premodern Chinese strategic thought that has important implications for contemporary international relations theory In applying a Western theoretical debate to China Iain Johnston advances rigorous procedures for testing for the existence and influence of strategic culture Johnston sets out to answer two empirical questions Is there a substantively consistent and temporally persistent Chinese strategic culture If so to what extent has it influenced China s approaches to security The focus of his study is the Ming dynasty s grand strategy against the Mongols 1368 1644 First Johnston examines ancient military texts as sources of Chinese strategic culture using cognitive mapping symbolic analysis and congruence tests to determine whether there is a consistent grand strategic preference ranking across texts that constitutes a single strategic culture Then he applies similar techniques to determine the effect of the strategic culture on the strategic preferences of the Ming decision makers Finally he assesses the effect of these preferences on Ming policies towards the Mongol threat The findings of this book challenge dominant interpretations of traditional Chinese strategic thought They suggest also that the roots of realpolitik are ideational and not predominantly structural The results lead to the surprising conclusion that there may be in fact fewer cross national differences in strategic culture than proponents of the strategic culture approach think
