Summer versus School II James Pedersen,David Hornak,Jon Mishra,2024-10-02 *Summer Versus School II* The Balanced Calendar of School Work and Life 2nd Edition examines the past and future of school calendars re examines the

time spent in schools and the benefits and challenges of a modified school calendar [Global report on teachers](#)
International Task Force on Teachers for Education 2030, UNESCO, 2024-02-24 Teachers are central to unlocking every learner's potential and achieving Sustainable Development Goal 4 of inclusive equitable and quality education for all. Regrettably worldwide teacher shortages have been endangering the future of education. New data collected for the Global Report on Teachers indicates that 44 million additional teachers are needed to achieve universal primary and secondary education by 2030. Shortages are widespread with sub-Saharan Africa needing 15 million more teachers while higher income countries face retention challenges resulting in teachers massively leaving the profession. Echoing calls from the International Commission on the Futures of Education and the 2022 Transforming Education Summit this report advocates for dignifying diversifying and valorizing the teaching profession. It emphasizes the importance of improved working conditions enhanced professional development and increased teacher involvement in decision making to bridge the gap. This report is a tool to mobilize international and country efforts to empower recruit train and support teachers within resilient education systems for a collaborative innovative and cohesive teaching profession. It is a roadmap aiming to elevate the status of the teaching profession and ensure quality education for all learners urging immediate action. [Revolutionary Struggles and Girls' Education](#) Thera Mjaaland, 2021-07-27 Revolutionary Struggles and Girls Education At the Frontiers of Gender Norms in North Ethiopia argues that at the base of girls poorer performance than boys at secondary school level when puberty has set in is the symbolic violence entailed in sanctioned femaleness. Informed by the modesty of Virgin Mary in Orthodox Christian veneration it instructs girls to internalize a holding back which impinges on her self efficacy and ability to be an active learner. Neoliberally informed educational policies and plans which have co-opted liberal feminism also in Ethiopia do not address hard lived gender norms and the power and domination dynamics entailed when parity between boys and girls in school continues to be the dominant measure for equity. Despite women's courageous contribution at a literal frontier during the Tigrayan liberation struggle 1975-91 where they fought on equal terms with men and despite the tendency that girls outnumber boys at secondary level in the present context sanctioned femaleness constitutes a frontier for girls educational success and transition to higher education. In fact when teaching learning continues to be based on memorization rather than critical thinking the very transformative potential of education is undermined also in a gendered sense. **Revised Code of Washington** Washington (State), 2021 [Getting Evidence into Education](#) Stephen Gorard, 2020-03-31 Worldwide there has been considerable progress in the quality of research evidence generated for use in education but not the equivalent growth in knowledge of how best to get this evidence into actual use. Yet with far reaching implications all of education is damaged when persuasive but poor quality evidence has widespread influence or good research lies unused. Focused on the work of the Durham University Evidence Centre for Education Getting Evidence into Education addresses this problem examining what can be done to improve the take up of suitable research evidence and

inform the public service of education Containing a variety of case studies from evidence based policies for early childhood education in Brazil to the use of evidence on contextualized admissions to Scottish universities the volume explores a variety of different ways to approach the problem addressing the questions What is the existing evidence on different approaches to getting research evidence into use What are the factors which influence the uptake of high quality research evidence by policy or practice Which are the most effective pathways for evidence into use in particular contexts Considering both the practical and ethical implications the book builds towards key recommendations for the research community practitioner bodies and policy makers and advisors directing them on how to communicate better with each other for the benefit of everyone
