### Scope

The scope of the study refers to the parameters under which the study will be operating. The problem you seek to resolve will fit within certain parameters. Think of the scope as the domain of your research—what's in the domain, and what is not. You need to make it as clear as possible what you will be studying and what factors are within the accepted range of your study. For example, if you are studying the ill effects of bullying on middle school children, the scope could include both face-to-face bullying and cyber-bullying in grades 6 through 8.

### Limitations

Limitations are matters and occurrences that arise in a study which are out of the researcher's control. They limit the extensivity to which a study can go, and sometimes affect the end result and conclusions that can be drawn. Every study, no matter how well it is conducted and constructed, has limitations. This is one of the reasons why we do not use the words "prove" and "disprove" with respect to research findings. It is always possible that future research may cast doubt on the validity of any hypothesis or conclusion from a study. Your study might have access to only certain people in an organization, certain documents, and certain data. These are limitations. Subsequent studies may overcome these limitations.

#### Limitations of Qualitative Studies

A limitation associated with qualitative study is related to validity and reliability. "Because qualitative research occurs in the natural setting it is extremely difficult to replicate studies" (Wiersma, 2000, p. 211). When you select certain methodologies and designs, for example phenomenology, they come with limitations over which you may have little control.

**Action Research from Concept to Presentation: a Practical Handbook to Writing Your Master's Thesis** Peter K. Lynch, Ryan C. Welch, 2014-07-03 Perhaps the most daunting graduate school requirement is the development of an action research Masters thesis This capstone task requires unprecedented amounts of time energy and verbiage Designed to take stress out of the thesis writing equation this student friendly comprehensive handbook glides the reader through a 28 step process from developing a focal topic to defending a scholarly thesis Framing each chapter as a one week action assignment the authors have broken down the process into manageable chunks to enable students writers to achieve an immediate sense of completion at every step By using this scaffolding approach the the authors encourage the student researcher to focus on one part of the process rather than the total sometimes overwhelming final product With the exception of the Review of the Literature section which takes several weeks to complete all other thesis sections can and should be timed out for seven days The Authors primary objective was to empower the student researcher to accomplish each of the steps in the process while never losing sight on the product that will help the children in their classrooms Whether developing an Abstract or writing in text citations student researchers are guided throughout he nuances of the Publication Manual of the American Psychological Associations 6th Edition

**The significance of female labour force participation in a recovering economy** Chloe Mahtaney, 2016-05-04 Master s Thesis from the year 2015 in the subject Business economics Business Management Corporate Governance grade Distinction South Bank University London London South Bank University School of Business course MBA language English abstract This dissertation considers that increasing Female Labour Force Participation FLFP can highly contribute during the recovery process of an economy in crisis and how the Cyprus job market has changed from pre to post crisis resulting in a high demand for jobs today High demand for jobs means that employers have a surplus of potential candidates to select from and therefore it can be assumed that they will be inclined to selecting candidates that can work under the terms of the employer

In most cases the demographic that is most likely be able to live up to those terms are the men in the Cyprus labour force While beneficial in the short run in respect of keeping HR budgets low the dissertation questions how this may impact companies in the long run in terms of job satisfaction and performance Assessment of the level of Work Life Balance WLB offered by corporate organisations is determined through primary and secondary forms of research and investigates whether or not it correlates to the lack of female decision makers and the Gender Pay Gap in Cyprus It identifies that the gender discrimination in the workplace in Cyprus does very much still exist namely due to traditionalist corporate cultures that are still in place as well as examining limitations imposed on women in terms of achieving senior roles in the workplace The rationale for primarily determining the current existence of these problems is to bring another assumed problem to the table of which that is the lack of flexible work options that Cyprus has on offer and in turn how opening the doors to more FLFP can benefit the private sector s performance in the market and in turn vastly contribute in terms of profitability to a recovering economy
