Tests that Second Language Teachers Make and Use Greta Gorsuch, 2019-10-24 Classroom tests are an everyday feature of second and foreign language classrooms worldwide. Teachers spend a lot of time and energy making and using tests and learners spend a lot of time and energy taking them. Nonetheless, such assessments are under studied as they are considered routine. This volume illuminates this little researched area. Featuring fifteen classroom language tests made and used by Chinese, English, French, German, Italian, Japanese, Russian, and Spanish teachers, the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers' processes of making and using their tests. Rather than view teachers' tests as poor shadows of what professional test writers do, this work identifies the reasoning behind teachers' tests. In addition, focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary. This book is an accessible applied resource for second and foreign language teachers, language program administrators working with teachers, students in teacher preparation and enrichment programs, and scholars in language teaching, learning, and testing.

Research, Practice, and Innovations in Teacher Education During a Virtual Age Zimmerman, Aaron Samuel, 2022-11-18 Decades of research have shown that early career teachers face a number of challenges and hold an increasingly wide set of responsibilities. Teacher educators therefore must think carefully about how to prepare early career teachers for the profession. Additionally, however, the work of teaching and teacher education has become increasingly complex within the context of the current virtual age, including the prominent reality of social media and the significant possibilities of online teaching and learning. *Research, Practice, and Innovations in Teacher Education During a Virtual Age* makes a significant contribution to the scholarship on teacher education by presenting a variety of evidence-based methods that can be used to develop and improve aspects of teacher education within this virtual age, including the curriculum and pedagogy of online teacher education, as well as effective ways to prepare preservice teachers for the realities of online teaching and online learning. Covering topics such as virtual caring, learning material adaptation, and instructional coaching, this premier reference source is a dynamic resource for teacher educators, preservice teachers, administrators, and educators of both K-12 and higher education, government officials, policymakers, researchers, and academicians.
