evidence from the initiation and implementation of IMF programs in Latin America and Eastern Europe From Economic Crisis to Reform shows that economic crises do not necessarily persuade governments to adopt IMF style economic policies Instead ideology interests and institutions at both the international and domestic levels mediate responses to such crises Grigore Pop Eleches explains that the IMF s response to economic crises reflects the changing priorities of large IMF member countries He argues that the IMF gives greater attention and favorable treatment to economic crises when they occur in economically or politically important countries The book also shows how during the neoliberal consensus of the 1990s economic crises triggered IMF style reforms from governments across the ideological spectrum and how these reforms were broadly compatible with democratic politics By contrast during the Latin American debt crisis the contentious politics of IMF programs reflected the ideological rivalries of the Cold War Economic crises triggered ideologically divergent domestic policy responses and democracy was often at odds with economic adjustment The author demonstrates that an economic crisis triggers neoliberal economic reforms only when the government and the IMF agree about the roots and severity of the crisis *Economic Trends* ,1996 **Economics** Roger A. Arnold,2001 *An Economic Model of the Demand and Need for Social Housing* Great Britain. Department of the Environment, Transport and the Regions,1997 Transition Report 2001 European Bank for Reconstruction and Development,2001 This report focuses upon aspects of energy production consumption and efficiency within the transition economies of the countries in central eastern Europe and the Baltic states south eastern Europe and the Commonwealth of Independent States The report is divided into two sections Part I considers issues of macroeconomic performance and future prospects for growth Part II contains an analysis of the primary and secondary energy sectors in these countries The report highlights the challenges facing the energy rich countries in managing their resources prudently It discusses key policy issues such as the need to strengthen governance and transparency in the energy sector and to increase savings to preserve national wealth for future generations It also looks at tariff reform as a means of improving energy efficiency and examines ways of ensuring that the poor do not suffer as a result of tariff adjustments It highlights the complementary role that private investment in the power sector can play in improving energy efficiency if accompanied by a strong regulatory framework The report also contains an assessment of the progress towards transition made by each country on a range of areas including liberalisation and macroeconomic stabilisation

Transition Report 1997 European Bank for Reconstruction and Development,1997 The Transition Report is a unique source of information on economic development in Central and Eastern Europe and the former Soviet Union Drawing on the EBRD s experience as an investor in twenty six countries in the region it offers a comprehensive analysis of each nation s progress in the move towards establishing a market economy Country by country tables and summaries offer much data on all advances made in the key areas of market liberalism and competition enterprise restructuring and privatization and financial sector reform as well as legal reform Providing extensive coverage of macroeconomic developments and structural

reform the annual Report will be essential reading for investors policy makers and researchers The special theme of the 1997 edition is enterprise performance and growth focusing on the foundations for a recovery in output and long term growth in the region

Event-driven Business Solutions Eric L. Denna,1993 Currently doing double duty when it comes to financial reporting accounting and information technology professionals have the unique opportunity to improve efficiency by downsizing into one department Event Driven Systems explains why this is an important cost saving measure and shows how to put this revolutionary idea into practice The authors challenge traditional thinking about accounting and information technology processes and the roles of the professionals who work in these specialized environments
