Biology: How Life Works (Volume 1) James Morris, 2013-01-04 Ordinarily textbooks are developed by first writing chapters then making decisions about art and images and finally once the book is complete assembling a test bank and ancillary media This process dramatically limits the integration across resources and reduces art media and assessments to ancillary material rather than essential resources for student learning Biology How Life Works is the first project to develop three pillars the text the visual program and the assessment at the same time All three pillars were developed in parallel to

make sure that each idea is addressed in the most appropriate medium and to ensure authentic integration These three pillars are all tied to the same set of core concepts share a common language and use the same visual palette In this way the text visual program and assessments are integral parts of student learning rather than just accessories to the text

Environmental Plant Physiology Neil Willey, 2018-10-26 Environmental Plant Physiology focuses on the physiology of plant environment interactions revealing plants as the key terrestrial intersection of the biosphere atmosphere hydrosphere and geosphere It provides a contemporary understanding of the topic by focusing on some of humankind's fundamental biological agricultural and environmental challenges Its chapters identify thirteen key environmental variables grouping them into resources stressors and pollutants and leading the reader through how they challenge plants and how plants respond at molecular physiological whole plant and ecological levels The importance of taking account of spatial and temporal dimensions of environmental change in order to understand plant function is emphasised The book uses a mixture of ecological environmental and agricultural examples throughout in order to provide a holistic view of the topic suitable for a contemporary student audience Each chapter uses a novel stress response hierarchy to integrate plant responses across spatial and temporal scales in an easily digestible framework
