Chapter 6 Chemical Bonds Section 6 4 The Structure Of Metals:

Chemical Structure and Bonding Roger L. DeKock, Harry B. Gray, 1989 Designed for use in inorganic physical and quantum chemistry courses this textbook includes numerous questions and problems at the end of each chapter and an Appendix with answers to most of the problems

Multiple Bonds between Metal Atoms F. Albert Cotton, Carlos A. Murillo, Richard A. Walton, 2006-07-31 Since the second edition of this book there has been so much published in the field that two points seemed clear One was a sense that a new up to date monograph was needed The other was the reluctance of two or even three people to undertake the daunting task of covering all the ground Our response was to call on others to help and thus to produce the present multiauthored volume Each of the contributing authors was in a position to write authoritatively from hands on research experience We are confident that this has led to a better book than the three of us would have produced As always in a book where different chapters are written by different authors there is some variation in style and we chose not to try to smooth it all out In every chapter the objective has been to be comprehensive if not encyclopedic Putting it a little differently we and the other authors have aimed to mention all pertinent literature references although the amount of emphasis accorded each paper necessarily varies Since the volume of literature to cover is now so large a few topics that might have been included or were in the second edition have been omitted or are covered only in limited detail
