1.1.1.1.1.1.1.5. Decision Trees

A decision tree is a flowchart representing a hierarchical partition of the feature space. The decision tree consists of nodes that form a rooted tree, starting at a root node with a node called "root". Each node has outgoing edges. Edges are called "branches" and are labeled with values. A node with outgoing edges is called an internal or node. All other nodes are called leaf nodes. Leaves are terminal or decision nodes. In a decision tree, each internal node splits the feature space into two or more subspaces, resulting in a certain structure of the feature space. The structure of the tree is determined by the

Intelligence and Security Informatics Hsinchun Chen, Christopher C. Yang, 2008-05-23 The IEEE International Conference on Intelligence and Security Informatics (ISI) and Pacific Asia Workshop on Intelligence and Security Informatics (PAISI) conference series (<http://www.isiconference.org>) have drawn significant attention in the recent years. Intelligence and Security Informatics is concerned with the study of the development and use of advanced information technologies and systems for national, international, and societal security-related applications. The ISI conference series have brought together academic researchers, law enforcement, and intelligence experts, information technology consultants, and practitioners to discuss their research and practice related to various ISI topics, including ISI data management, data and text mining for ISI applications, terrorism informatics, deception and intent detection, terrorist and criminal social network analysis, public health and biosecurity, crime analysis, cyber infrastructure protection, transportation infrastructure security, policy studies, and evaluation, information assurance, among others. In this book, we collect the work of the most active researchers in the area. Topics include data and text mining in terrorism, information sharing, social network analysis, Web-based intelligence monitoring and analysis, crime data analysis, infrastructure protection, deception and intent detection, and more. Scope and Organization The book is organized in four major areas. The first unit focuses on the terrorism informatics and data mining. The second unit discusses the intelligence and crime analysis. The third unit covers access control, infrastructure protection, and privacy. The fourth unit presents surveillance and emergency response. **Desert Olive Oil Cultivation** Zeev Wiesman, 2009-06-24 Due to the adverse stress conditions typical of olive cultivation in desert conditions, the olive tree is responding with production of high levels of antioxidant substances. Among these substances are polyphenols, tocopherols, and phytosterols. Studies have

shown that saline irrigated varieties of olives have demonstrated advantages over those irrigated with tap water This is just one of the aspects of desert cultivation of olives that is covered in *Desert Olive Oil Advanced Biotechnologies Based on 20 years of research* the book expounds on the appropriate selection of olive varieties with high productivity and oil quality the impact of foliar nutrition on decreasing alternate bearing and increasing fruit quality improving efficiency of mechanical harvesting and increasing efficiency of oil extraction and oil quality regulating analysis Addresses olive cultivation methods for semi arid environments Focuses on intensive cultivation using saline and municipal waste recycled irrigation water and their significant impact on the production and nutritional value of olive oil Integrated and multidisciplinary approaches providing a comprehensive view of the desert olive industry Provides key considerations including ecological biotechnological agricultural and political impacts **Index Veterinarius** ,2005 Finances Publiques ,1989 **Proceedings** ,2005
