1. When an organism dies it can form a hollow imprint of itself in sediment. Over time this sediment hardens into rock. The imprint fills up with sediment and gradually hardens into the shape of the organism. Which type of fossil is this? **Mold (Hollow Imprint) Casts (Filling)**

2. Which type of fossil is evidence of the activities of ancient organisms?

**Trace**

3. Trace fossils can reveal many things of an organism's physical attributes. They are the evidence of the animal's activity. Give three examples of a trace fossil.

**Footprints/Animal Waste**

4. Which type of fossil describes the process of which dinosaur bones are replaced by hardened minerals?

**Petrified**

5. The remains of some organisms can be preserved with little or no change. What are three ways in which an organism can be preserved?

**Ice, Amber, and Tar**

6. How does a petrified fossil form?

**Animals die, water seeps into organism, water evaporates and all that is left is hardened minerals**

7. Entire organisms have been found encased in amber, which is a gold-colored resin that formed from pine tree sap. Ants, pollen, bees, and other organisms have been found in this resin. This is an example of which type of fossil?

**Preserved**

8. When sediment buries an organism, some of the materials that make up the organism evaporate or become gases. These gases escape from the sediment, leaving carbon behind. Only a thin film of carbon remains. What type of fossil is this? **Carbon Film**

**8Th Grade Georgia Milestone Test Prep Study Guide** Mark Shannon, 2018-01-18 This test prep is good for kids who are on the fence and having trouble passing or need to increase their margin These kids will often say I DON T KNOW WHERE TO START when explaining their confusion This book address that problem with three approaches 1 In contrast with the other study guides that use random questions in their practice exams this book collated the questions into chapters based on the logic to solve them The 8th grade book is divided into nine chapters They are Logic Arithmetic Geometry Fractions Reading Graphs and tables Measurements including a ruler basic statistics order of operations and Algebra This book teaches basics then goes into practice exams with word problems Once the student is proficient with the questions organized into chapters then they are ready for random questions 2 This study guide has thousands of practice problems I have placed over 3100 videos on YouTube showing you how to work the problems 3 I reviewed several years of past exams and placed enfaces on the easiest and most common questions Mastering these questions should yield a 75% to 80% If a student is already achieving this percentage the other guides or web site with random questions and covering all material might be best A book might be better for your student than the web sites for two

reasons 1 The more common and easiest questions are using a ruler to measure The web designers don't know the size of your computer screen and can't determine if the student has measured correctly We can get a high percentage of these problems easily 2 When studying on a computer there are too many websites with the answers With a book parents can have greater assurance the work is being done This book is developed by a trained professional out of concern It is not the product of a large publishing house It is the results of one person who wants to help Best Regards Mark Shannon
