**Computational Materials, Chemistry, and Biochemistry: From Bold Initiatives to the Last Mile** Sadasivan Shankar, Richard Muller, Thom Dunning, Guan Hua Chen, 2021-01-25 This book provides a broad and nuanced overview of the achievements and legacy of Professor William Bill

Goddard in the field of computational materials and molecular science. Leading researchers from around the globe discuss Goddard's work and its lasting impacts which can be seen in today's cutting edge chemistry, materials science, and biology techniques. Each section of the book closes with an outline of the prospects for future developments. In the course of a career spanning more than 50 years, Goddard's seminal work has led to dramatic advances in a diverse range of science and engineering fields. Presenting scientific essays and reflections by students, postdoctoral associates, collaborators, and colleagues, the book describes the contributions of one of the world's greatest materials and molecular scientists in the context of theory, experimentation, and applications, and examines his legacy in each area, from conceptualization, the first mile, to developments and extensions aimed at applications, and lastly, to de novo design, the last mile. Goddard's passion for science, his insights, and his ability to actively engage with his collaborators in bold initiatives is a model for us all. As he enters his second half century of scientific research and education, this book inspires future generations of students and researchers to employ and extend these powerful techniques and insights to tackle today's critical problems in biology, chemistry, and materials. Examples highlighted in the book include new materials for photocatalysts to convert water and CO<sub>2</sub> into fuels, novel catalysts for the highly selective and active catalysis of alkanes to valuable organics, simulating the chemistry in film growth to develop two-dimensional functional films, and predicting ligand-protein binding and activation to enable the design of targeted drugs with minimal side effects.

**Computational Intelligence and Intelligent Systems** Hu Peng, Changshou Deng, Zhijian Wu, Yong Liu, 2019-02-07. This book constitutes the thoroughly refereed proceedings of the 10th International Symposium ISICA 2018 held in Jiujiang, China, in October 2018. The 32 full papers presented were carefully reviewed and selected from 83 submissions. The papers are organized in topical sections on: nature-inspired computing; bio-inspired computing; novel operators in evolutionary algorithms; automatic object segmentation and detection; and image colorization; multilingual automatic document classification and translation; knowledge-based artificial intelligence; predictive data mining.
