First Bite Bee
Wilson, 2015-12-01 We are not born knowing what to eat as omnivores it is something we each have to figure out for
ourselves From childhood onward we learn how big a portion is and how sweet is too sweet We learn to enjoy green
vegetables or not But how does this education happen What are the origins of taste In First Bite award winning food writer
Bee Wilson draws on the latest research from food psychologists neuroscientists and nutritionists to reveal that our food
habits are shaped by a whole host of factors family and culture memory and gender hunger and love Taking the reader on a
journey across the globe Wilson introduces us to people who can only eat foods of a certain color prisoners of war whose
deepest yearning is for Mom s apple pie a nine year old anosmia sufferer who has no memory of the flavor of her mother s
cooking toddlers who will eat nothing but hotdogs and grilled cheese sandwiches and researchers and doctors who have
pioneered new and effective ways to persuade children to try new vegetables Wilson examines why the Japanese eat so
healthily whereas the vast majority of teenage boys in Kuwait have a weight problem and what these facts can tell Americans
about how to eat better The way we learn to eat holds the key to why food has gone so disastrously wrong for so many people
But Wilson also shows that both adults and children have immense potential for learning new healthy eating habits An
exploration of the extraordinary and surprising origins of our tastes and eating habits First Bite also shows us how we can
