interested in the issues strategies and methods of psychiatric research Although the field of psychiatry has not attained the  
scientific rigor and clinical sophistication of some of its sister disciplines in the medical arena considerable progress has been  
made in the last decade or two and a full understanding of the types of articles that now appear in such publications as the  
American Journal of Psychiatry the Archives of General Psychiatry and the Journal of the American Academy of Child and  
Adolescent Psychiatry requires a fair amount of knowledge about research design and strategy Whereas articles in  
psychiatric journals 20 years ago dealt mainly with psychodynamic topics and utilized nonexperimental observations today  
their counterparts are concerned mostly with psychobiology clinical features diagnosis and treatment and employ scientific  
experimental designs The trend of applying scientific methodology to research in psychiatry is increasing and undoubtedly
