What's Wrong with Climate Politics and How to Fix It Paul G. Harris, 2013-07-11 Governments have failed to stem global emissions of carbon dioxide and other greenhouse gases causing climate change Indeed climate changing pollution is increasing globally and will do so for decades to come without far more aggressive action What explains this failure to effectively tackle one of the world's most serious problems And what can we do about it To answer these questions Paul G Harris looks at climate politics as a doctor might look at a very sick patient He performs urgent diagnoses and prescribes vital treatments to revive our ailing planet before it's too late The book begins by diagnosing what's most wrong with climate politics including the anachronistic international system which encourages nations to fight for their narrowly perceived interests and makes major cuts in greenhouse pollution extraordinarily difficult the deadlock between the United States and China which together produce over one third of global greenhouse gas pollution but do little more than demand that the other act first and affluent lifestyles and overconsumption which are spreading rapidly from industrialized nations to the developing world The book then prescribes several remedies for the failed politics of climate change including a new kind of climate diplomacy with people at its center national policies that put the common but differentiated responsibilities of individuals alongside those of nations and a

campaign for simultaneously enhancing human wellbeing and environmental sustainability While these treatments are aspirational they are not intended to be utopian As Harris shows they are genuine workable solutions to what ails the politics of climate change today **Science, Politics, and the Anthropocene Working Group** Alexander Damianos,2025-11-03 Between 2009 and 2024 the Anthropocene Working Group AWG an interdisciplinary team of geologists archaeologists Earth systems scientists historians of science and one lawyer sought to formalise the Anthropocene as a formal unit of the Geologic Time Scale Science Politics and the Anthropocene Working Group What Was the Anthropocene presents the first comprehensive ethnographic and history of science study of the AWG s formalisation effort Drawing on original archival research this book provides a history of the formalisation procedure as well as the practices of measurement and correlation particularly to the amendment of the Geologic Time Scale Through participant observation this book explains how the AWG applied geological methods and practices to situate contemporary society within the context of 4.5 billion years of Earth s history Positioning contemporary debates concerning the Anthropocene within a historical appraisal of geoscience Science Politics and the Anthropocene Working Group What Was the Anthropocene offers a unique multidisciplinary perspective on how scientific knowledge is shaped and legitimised under conditions of the climate crisis Science Politics and the Anthropocene Working Group What Was the Anthropocene provides an invaluable resource for scholars of all levels studying geosciences the history of science social studies of science and the Anthropocene The Wall Street Journal ,2009
