Carbohydrates Synthesis Mechanisms And Stereoelectronic Effects:

Carbohydrates Momcilo Miljkovic, 2009-09-18 All essential areas of basic synthetic carbohydrate chemistry are covered and appropriately described In addition this book explains the basic reaction mechanisms while taking into account modern concepts such as stereoelectronic principles **Electrostatic and Stereoelectronic Effects in Carbohydrate Chemistry**

Momcilo Miljkovic, 2014-01-06 The book deals with polar effects in carbohydrates and how these effects control the stereochemistry of carbohydrate reactions This is important for understanding the mechanisms of certain carbohydrate reactions including enzymatic reactions such as glycosidases a very important group of enzymes in living matter It is also very useful for synthetic carbohydrate chemists who would like to synthesize stereoselectively certain classes of carbohydrates This book will be a very important source of information for practicing synthetic carbohydrate chemists The book will also be helpful for organic chemists or for those studying glycobiology *Chemistry of Renewables* Arno

Behr, Thomas Seidensticker, 2020-10-29 This textbook introduces the industrial production and processing of natural resources It is divided into six major topics fats and oils carbohydrates lignin terpenoids other natural products biorefinery which are divided into a total of 20 chapters Each chapter is self contained and therefore a compact learning unit which can be worked on by students in self study or presented by lecturers Clear illustrations flow diagrams apparatus drawings and photos facilitate the understanding of the subject matter All chapters end with a succinct summary the Take Home Messages Each chapter is supplemented by ten short test questions which can be solved quickly after working through the chapter the answers are at the end of the book All chapters contain bibliographical references that focus on essential textbooks and reference works As a prior knowledge only basic knowledge of chemistry is required **Glycobiology of the Nervous**

System Robert K. Yu, Cara-Lynne Schengrund, 2014-08-23 A thorough introduction is provided to the variety and complexity of the roles that glycoconjugates play in the cells of the nervous system Basic information as well as the latest developments in neural glycobiology are discussed Topics covered range from the structure and metabolism of the saccharide chains and current approaches used in their study to changes glycoconjugates undergo during development and aging of the nervous system and the roles they have in neurological disease The breadth and depth of topics covered make it an essential reference for those new to the field as well more seasoned investigators *Glycobiology of the Nervous System* Cara-Lynne

Schengrund, Robert K. Yu, 2022-10-18 This new edition provides comprehensive coverage of the variety and complexity of the roles that glycoconjugates play in the cells of the nervous system Basic fundamental principles as well as the latest developments in neural glycobiology are discussed Topics covered range from the structure and metabolism of the saccharide chains and current approaches used in their study to changes glycoconjugates undergo during development and aging of the nervous system and the roles they have in neurological disease New topics include a detailed discussion of cells found within the nervous system an extensive listing of congenital disorders of glycosylation of both proteins and lipids the

roles of glycans in neuronal axon growth guidance and voltage gated channels the role of intra lysosomal luminal vesicles in lysosomal storage disorders and in the time of the COVID 19 pandemic the role of carbohydrates in infection by SARS CoV 2 The breadth and depth of topics covered make this an essential reference for those new to the field as well as for more experienced investigators

Homogeneous Catalysis with Renewables Arno Behr, Andreas J. Vorholt, 2017-05-31 This volume gives a detailed account into how renewables can be transformed into value added products via homogeneous catalysis especially via transition metal homogeneous catalysis The most important catalytic reactions of oleochemicals isoprenoids carbohydrates lignin proteins and carbon dioxide are described Special emphasis is placed on carbon carbon linkage reactions hydroformylations dimerisations telomerisations metathesis polymerisations etc hydrogenations oxidations and other important homogeneous reactions such as isomerisations hydrosilylations etc Also tandem reactions including isomerising hydroformylations are presented Wherever possible the authors have included mechanistic kinetic and technical aspects The reader is therefore given a total overview of the status quo of homogeneous catalysis directed to the most important renewables

Exploration on Quantum Chemical Potential Energy Surfaces Koichi Ohno, Hiroko Satoh, 2022-12-12 Written chemical formulas such as C_2H_6O can tell us the constituent atoms a molecule contains but they cannot differentiate between the possible geometrical arrangements isomers of these models Yet the chemical properties of different isomers can vary hugely Therefore to understand the world of chemistry we need to ask what kind of isomers can be produced from a given atomic composition how are isomers converted into each other how do they decompose into smaller pieces and how can they be made from smaller pieces The answers to these questions will help us to discover new chemistry and new molecules A potential energy surface PES describes a system such as a molecule based on geometrical parameters The mathematical properties of the PES can be used to calculate probable isomer structures as well as how they are formed and how they might behave *Exploration on Quantum Chemical Potential Energy Surfaces* focuses on the PES search based on quantum chemical calculations It describes how to explore the chemical world on PES discusses fundamental methods and specific techniques developed for efficient exploration on PES and demonstrates several examples of the PES search for chemical structures and reaction routes

Advances in Carbohydrate Chemistry and Biochemistry, 2003-12-17 Since its inception in 1945 *Advances in Carbohydrate Chemistry and Biochemistry* has provided critical and integrating articles written by research specialists that integrate industrial analytical and technological aspects of biochemistry organic chemistry and instrumentation methodology in the study of carbohydrates The articles provide a definitive interpretation of the current status and future trends in carbohydrate chemistry and biochemistry High quality comprehensive reviews covering all aspects of carbohydrate chemistry
