Introduction to Theory-Driven Program Evaluation
Stewart I. Donaldson, 2021-09-30
Introduction to Theory-Driven Program Evaluation provides a clear guide for practicing evaluation science and numerous examples of how these evaluations actually unfold in contemporary practice. A special emphasis is placed on how to conduct theory-driven program evaluations that are culturally responsive and strengths-focused. In this thoroughly revised new edition, author Stewart I. Donaldson provides a state-of-the-art treatment of the basics of conducting theory-driven program evaluations. Each case follows a three-step model: developing program impact theory, formulating and prioritizing evaluation questions, and answering evaluation questions. The initial chapters discuss the evolution and popularity of theory-driven program evaluation, as well as a step-by-step guide for culturally responsive and strengths-focused applications. Succeeding chapters provide actual cases and discuss the practical implications of theory-driven evaluation science. Reflections, challenges, and lessons learned across numerous cases from practices are discussed. The volume is of significant value to practicing evaluators, professors of introductory evaluation courses, and their students, advanced undergraduate and graduate students, and serves as a text or a supplementary text for a wide range of evaluation and applied research courses. It is also of great interest to those interested in the connections between work and health, well-being, career development, human service organizations, and organizational improvement and effectiveness.

Grading for Equity
Joe Feldman, 2018-09-25
Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. This must-have book will help teachers learn to implement improved equity-focused grading for impact. Zaretta Hammond, Author of Culturally Responsive Teaching: The Brain Crack, opens the grading conversation. Here, at last, and none too soon, is a resource that delivers the research-based tools and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With Grading for Equity, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, Grading for Equity provides a critical historical backdrop describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a fixed mindset about students' academic potential. Practices that are still in place a century later. A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a true north orientation toward equitable grading practices. Specific grading practices that are more equitable, along with teacher examples, strategies to solve common

hiccups and concerns and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes Grading practices are a mirror not just for students but for us as their teachers Each one of us should start by asking What do my grading practices say about who I am and what I believe Then let s make the choice to do things differently with Grading for Equity as a dog eared reference
