

# Social Theory

## Introduction

In order to change society, or even to participate effectively in it, some understanding of how society works is essential. Social Theory provides the theoretical underpinnings for the discipline of sociology and also includes many of the central ideas found in anthropology, politics, education, social psychology, international relations, cultural studies, social work and human services. At the broadest level, social or sociological theory increases our understanding of society by elucidating social inequality, difference and change.

## Overview

1)

1. What is Sociology
2. Structure and Agency
3. Culture
4. Modernity, Postmodernity & Globalisation
5. Using the sociological imagination
6. Making Links To Practice

## Sociology and Social Theory

- **Sociology** is a science guided by the basic understanding that the **social matters**: our lives are affected not only by our individual characteristics, but by our place in the social world.
- **Social Theory** provides the theoretical underpinnings for the discipline of **Sociology** and also includes many of the central ideas found in anthropology, politics, education, social psychology, international relations, cultural studies, social work and human services.
- **Social Theory** adds depth to common-sense perspectives and offers alternatives by challenging our everyday assumptions about how the social world operates.
- To think sociologically we must think for ourselves and question the social systems we often take for granted.

## The Social World

To understand the social world — how it is organised, develops and changes:

- We have to understand what sociologist Anthony Giddens (1992, p. 14) calls 'the double involvement of individuals and institutions'.
- Meaning people, as individuals and in groups, 'create society', create the social world in which they live. However at the same time as people create the social world, they are simultaneously being 'created by it' (Giddens, 1992, p. 14).

**In all our interactions in society**

- We must consider **human agency** (our role in the creation of the social world) and **social structure** (the role of the social world in our interactions with society).
