Lecture-tutorials for Introductory Astronomy
Edward E. Prather, Timothy F. Slater, Jack A. Dostal, Colin S. Wallace, Jeffrey P. Adams, Gina Brissenden, 2013 Lecture Tutorials for Introductory Astronomy provides a collection of 44 collaborative learning inquiry based activities to be used in introductory astronomy courses Based on education research these activities are classroom ready and lead to deeper more complete student understanding through a series of structured questions that prompt students to use reasoning and identify and correct their misconceptions All content has been extensively field tested and six new tutorials have been added that respond to reviewer demand numerous interviews and nationally conducted workshops An Instructor Resource Center page is available with complete notes and text art

Journal of Geoscience Education, 1997

Active Learning in College Science Joel J. Mintzes, Emily M. Walter, 2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman's challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book's final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we

highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of naive notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for

Doing Research to Improve Teaching and Learning Kimberly M. Williams, 2021-07-29 In this rapidly changing teaching and learning environment one of the most promising ways for faculty at institutions of higher education to improve their teaching is to capitalize upon their skills as researchers This book is a step by step guide for doing research to inform and improve teaching and learning With background and instruction about how to engage in these methodologies including historical analyses qualitative quantitative and mixed methods the second edition of *Doing Research to Improve Teaching and Learning* discusses a process of working collaboratively and reflectively to improve one's teaching craft Full of updated authentic examples from research studies student work and instructor reflections this valuable resource equips faculty with the skills to collect and use data and evidence based instructional methods in any college and university classroom

Handbook of College Science Teaching Joel J. Mintzes, 2006 The Handbook offers models of teaching and learning that go beyond the typical lecture laboratory format and provides rationales for new practices in the college classroom It is ideal for graduate teaching assistants senior faculty and graduate coordinators and mid career professors in search of reinvigoration

Announcer, 2004

Measurements in Evaluating Science Education Amy J. Catalano, Michael A. Marino, 2020-05-06 *Measurements in Evaluating Science Education* is a comprehensive intuitive guide to many of the key instruments created to assess science education environments learning and instruction Nearly 70 different surveys tests scales and other metrics are organized according to the qualities the measures attempt to gauge such as attitudes toward science beliefs and misconceptions self efficacy and content knowledge Summaries of each instrument usage information developmental history and validation and reported psychometric properties make this an essential reference for anyone interested in understanding science education assessment
