Supply Chain Vulnerabilities Impacting Commercial Aviation Kirsten M Koepsel,2019-09-04 Written by Kirsten Koepsel a lawyer and engineer whose work has focused on aviation cybersecurity Supply Chain Vulnerabilities Impacting Commercial Aviation addresses the big question facing aircraft manufacturers today keep the work in house or outsource it The ongoing battle between cost cutting and supply chain control is ever more visible as aircraft OEMs have full order books and tight delivery schedules Since the 1980s commercial aviation like many other industries looked for ways of more economically sourcing parts and services The new partnerships between OEMs and suppliers at multiple levels did make the industry nimbler and more exible Yet it also introduced a higher level of instability risks and vulnerabilities to the aviation ecosystem Supply Chain Vulnerabilities Impacting Commercial Aviation discusses the differences in requirements depending on the buyer of the aircraft governmental or not ranging from delivery delays to risks linked to cybersecurity and the Internet of Things IoT including possible problems with faulty sensors and counterfeit parts The book also analyses the consequences of not having visibility into lower tier suppliers and how prepared they are when it comes to possible disruptions such as earthquakes or political unrest

The Aerospace Supply Chain and Cyber Security Kirsten M Koepsel,2018-07-20 The Aerospace Supply Chain and Cyber Security Challenges Ahead looks at the current state of commercial aviation and cyber security how information technology and its attractiveness to cyber attacks is affecting it and the way supply chains have become a vital part of the industry s cyber security strategy More than ever before commercial aviation relies on information and communications technology Some examples of this include the use of e tickets by passengers electronic flight bags by pilots wireless web access in flight not to mention the thousands of sensors throughout the aircraft constantly gathering and sharing data with the crew on the ground The same way technology opens the doors for speed efficiency and convenience it also offers the unintended opportunity for malicious cyber attacks with threat agents becoming bolder and choosing any possible apertures to breach security Supply chains are now being seriously targeted as a pathway to the vital core of organizations around the world Written in a direct and informative way The Aerospace Supply Chain and Cyber Security Challenges Ahead discusses the importance of deeply mapping one s supply chain to identify risky suppliers or potential disruptions developing supplier monitoring programs to identify critical suppliers and identifying alternative sources for IT ICT products or components to name a few of the necessary actions to be taken by the industry The Aerospace Supply Chain and Cyber Security Challenges Ahead also discusses the standardization of communications platforms and its pitfalls the invisible costs associated with cyber attacks how to identify vulnerabilities of the supply chain and what future scenarios are likely to play out in this arena For those interested in the many aspects of cyber security The Aerospace Supply Chain and Cyber Security Challenges Ahead is a must read

The Smartification of Everything Masha Gugganig,Kelly Bronson,Vincent Mirza,2025-10-14 From the smart phone to the smart home smartness has become an almost inescapable reality of everyday

life. Supposedly intelligent interconnected technologies smart systems have taken on their own forms of life and it is no longer easy to determine who these systems benefit and what their long term social and ethical implications may be. In twenty contributions spanning the social sciences, humanities and the arts, *The Smartification of Everything* offers a deep dive into a variety of studies that critically interrogate smartification processes and systems. The book is edited by experts in science and technology studies, STS, anthropology and sociology and is written by academics and artists working across a diverse range of disciplines including geography, architecture and urban studies among others. The volume moves beyond the digital hype cycle around smart cities, artificial intelligence or the Internet of Things which presents smart tech as neat spaces of continuous improvement. Instead, the authors illustrate how smartness is partial, messy and contested while also situated in specific sociocultural, historical, spatial and political realities. *The Smartification of Everything* questions the potential and the limitations of smart systems and in doing so furthers our understanding of the complex dynamics today among technology, environment and power.
