Translation and Interdisciplinarity Faruk Yücel, Mehmet Tahir Öncü, 2022-12-12 Interdisciplinarity is significant in the age of globalization and digitalization. It creates new opportunities through comparison and analysis of different findings and methods. Furthermore, it expands the boundaries of each discipline; each topic or phenomenon can be viewed under a whole new light. Instead of conventional or traditional methods, interdisciplinary cooperation can lead to innovative approaches that can contribute to the value of each discipline involved. It also requires respect and recognition between disciplines; their independent positions could be questioned or justified based on their interrelationship. Moreover, interdisciplinary work brings together diverse experts who cooperate and share their findings with each other. In this sense, interdisciplinarity can be seen as a dialogue between disciplines. In this complex interaction, a third field may emerge that transcends the boundaries of each independent discipline. Since relatively young Translation Studies has long been influenced by other disciplines, its boundaries could be defined through interdisciplinarity. In this book, numerous translation scholars engage with the relationship between translation and other disciplines. Translation here is not only to be understood as a transmission of texts but in a broader sense as denoting a transformation of different phenomena that could be studied both as a product and as a process.
