process usually lasting around 3-4 weeks before harvest stimulates the production of chlorophyll and amino acids particularly L-theanine. This gives matcha its vivid green color and unique umami-rich taste profile. Upon harvesting, the leaves undergo steaming to prevent fermentation and preserve their vibrant green color. They are then dried and deveined, leaving only the precious leaf flesh known as tencha. This tencha is stone-ground into a fine talc-like powder, resulting in matcha. The preparation of matcha involves whisking the powder with hot water using a bamboo whisk (chasen) until a frothy, smooth consistency is achieved. Unlike steeped teas where leaves are infused and removed, matcha incorporates the entire leaf, providing a concentrated dose of nutrients, antioxidants, and flavor in every sip. Matcha boasts a unique combination of caffeine and L-theanine, resulting in a calm, focused energy without the jitteriness often associated with coffee. This blend of compounds offers mental clarity, relaxation, and an extended sense of alertness.
