A Touch Of Code Interactive Installations And Experiences:

A Touch of Code Robert Klanten, Sven Ehmann, Verena Hanschke, Lukas Feireiss, 2011 Today's designers are creating compelling atmospheres and interactive experiences by merging hardware and software with architecture and design. This book is a collection of this innovative work produced where virtual realms meet the real world and where dataflow confronts the human senses. It presents an international spectrum of interdisciplinary projects at the intersection of laboratory, trade show and urban space that play with the new frontiers of perception, interaction and staging created by current technology. The work reveals how technology is fundamentally changing and expanding strategies for the targeted use of architecture, art, communication and design for the future. *The Oxford Handbook of Interactive Audio* Karen Collins, Bill Kapralos, Holly Tessler, 2014 What does it mean to interact with sound? How does interactivity alter our experience as creators and listeners? What does the future hold for interactive musical and sonic experiences? This book answers these questions with newly commissioned chapters that explore the full range of interactive audio in games, performance, design and practice.

Design, User Experience, and Usability: User Experience in Novel Technological Environments Aaron Marcus, 2013-07-01 The four volume set LNCS 8012, 8013, 8014 and 8015 constitutes the proceedings of the Second International Conference on Design, User Experience and Usability (DUXU 2013) held as part of the 15th International Conference on Human-Computer Interaction (HCI 2013) held in Las Vegas, USA in July 2013 jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCI 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four volume set. The 65 papers included in this volume are organized in the following topical sections: designing for safe and secure environments; designing for smart and ambient devices; designing for virtual and augmented environments; and emotional and persuasion design.
