A Common Sense Geographic Knowledge Base For Gir:

Web and Wireless Geographical Information Systems Katsushi Tanaka, Peter Fröhlich, Kyoung-Sook Kim, 2011-02-15

This book constitutes the refereed proceedings of the 10th International Symposium on Web and Wireless Geographical Information Systems W2GIS 2011 held in Kyoto Japan in March 2011. A total of 13 full and 3 short papers plus 2 short keynote papers presented were carefully reviewed and selected from 36 submissions. The papers cover a wide range of topics including geographic information retrieval on the web, geo spatial semantic and sensor web location based services, advanced GIS visualization techniques, personalization and adjustment for mobile GIS applications, and geo spatial data quality and context processing. Universal Ontology of Geographic Space: Semantic Enrichment for Spatial Data Podobnikar,

Tomaž, Čeh, Marjan, 2012-03-31. A universal approach to the ontology of geographic space has already been and is going to be a comprehensive task for establishing more effective spatial models. The concept of a universal spatial ontology should be independent of location, culture, and time. It should be fundamental and universal in the same way that the number π defines the ratio between the diameter and the circumference of a circle. The term universal therefore means all embracing and for general purpose. Universal Ontology of Geographic Space: Semantic Enrichment for Spatial Data aims to escalate the current scope of research to support the development of semantically interoperable systems of geographic space. This reference will aid university lecturers and professors, students, researchers, and developers of spatial applications. **Science in China**, 2008

Quality Issues in the Management of Web Information Gabriella Pasi, Gloria Bordogna, Lakhmi C. Jain, 2013-04-17

This research volume presents a sample of recent contributions related to the issue of quality assessment for Web Based information in the context of information access, retrieval, and filtering systems. The advent of the Web and the uncontrolled process of documents generation have raised the problem of declining quality assessment to information on the Web by considering both the nature of documents (texts, images, video, sounds) and so on, the genre of documents (news, geographic information, ontologies, medical records, products, records) and so on, the reputation of information sources and sites, and last but not least, the actions performed on documents (content indexing, retrieval, and ranking, collaborative filtering) and so on. The volume constitutes a compendium of both heterogeneous approaches and sample applications focusing specific aspects of the quality assessment for Web based information for researchers, PhD students, and practitioners carrying out their research activity in the field of Web information retrieval and filtering. Web information mining, information quality, representation, and management. Database Engineered Applications Richard Chbeir, Sergio Ilarri, Yannis Manolopoulos, Peter Z. Revesz, Jorge Bernardino, Carson K. Leung, 2025-03-15

This LNCS conference volume constitutes the proceedings of the 28th International Symposium on Database Engineered Applications IDEAS 2024 in Bayonne, France, in August 2024. The 21 full papers together with 5 short papers included in this volume were carefully reviewed and selected from 34 submissions. The symposium presents papers in the broader field of data management and were organized in seven sessions: 1 Theoretical Issues, 2
