Campbell Biology Eighth Edition:

Biology [8th Edition] Volume 1, Custom Edition Neil A. Campbell, 2008 *Biology* Neil A. Campbell, Jane B. Reece, 2005
Neil Campbell and Jane Reece's BIOLOGY remains unsurpassed as the most successful majors biology textbook in the world. This text has invited more than 4 million students into the study of this dynamic and essential discipline. The authors have restructured each chapter around a conceptual framework of five or six big ideas. An Overview draws students in and sets the stage for the rest of the chapter; each numbered Concept Head announces the beginning of a new concept, and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept. New Inquiry Figures focus students on the experimental process, and new Research Method Figures illustrate important techniques in biology. Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter. *Campbell Biology* Jane B. Reece, Martha R. Taylor, Eric J. Simon, Jean L. Dickey, 2011-02-09 ALERT

This book introduces the reader to the exciting new field of plant philosophy and takes it in a new direction to ask what does it mean to say that plants are sexed. Do male and female really mean the same when applied to humans, trees, fungi, and algae? Are the zoological categories of sex really adequate for understanding the uniquely dibiontic life cycle of plants? *Vegetal Sex* addresses these questions through a detailed analysis of major moments in the history of plant sex from Aristotle to the modern day. Tracing the transformations in the analogy between animals and plants that characterize this history, it shows how the analogy still functions in contemporary botany and asks what would a non-zoocentric, plant-centred philosophy of vegetal sex be like. By showing how philosophy and botany have been and still are inextricably entwined, *Vegetal Sex* allows us to think vegetal being and perhaps to recognize the vegetal in us all. **Campbell Biology** Jane B.
