Essential Endocrinology 4th Edition:

Essential Endocrinology John F. Laycock, Peter H. Wise, 1996 This new edition of a successful and previously popular reference textbook covers all the relevant material in an organized fashion and to a slightly higher level than the earlier editions The book is therefore suitable for MRCP students as well as undergraduates and can be carried forward to the clinical years without losing the continuity between physiology and pathophysiology This is a comprehensive account of the general principles of endocrinology with a full physiological basis It is fully up to date covering the recent major developments and is improved with numerous additions and alterations The clinical approach required by many courses is covered and the normal functioning of the glands and hormones is closely linked with a discussion of related clinical problems There is an increased number of line drawings and plates so that the book systematically includes clinical photographs of all important endocrinopathies and in this edition there is a small number of colour plates comprising a mini atlas

Essential Endocrinology Charles Groves Darville Brook, Nicholas J. Marshall, 1996 The first Manual of Symbols and Terminology for Physicochemical Quantities and Units the Green Book of which this is a direct successor was published in 1969 with the objective of securing clarity and precision and wider agreement in the use of symbols by chemists in different countries among physicists chemists and engineers and by editors of scientific journals Subsequent editions of this book and of Quantities Units and Symbols in Physical Chemistry have been substantially revised and extended containing many new resolutions and recommendations from Conference Generale des Poids et Mesures International Union of Pure and Applied Chemistry the International
