Generative Systems and Intelligent Tutoring Systems Sabine Graf, Angelos Markos, 2025-07-28 This book constitutes the refereed proceedings of the 21st International Conference on Intelligent Tutoring Systems ITS 2025 held in Alexandroupolis Greece during June 2 6 2025 The 21 full papers 27 short papers and 5 posters included in this book were carefully reviewed and selected from 67 submissions The papers are organized in the following topical conference tracks Part I Generative Tutoring Systems The goal of this part is to show how new techniques inspired by artificial intelligence AI and new methods in education can improve learning teaching and generate the capacity for knowledge acquisition and much more Part II Application areas environments and techniques for AI systems This part shows the progress of research investigating the different application areas such as education health techniques such as neural networks data mining natural language processing and environments such as games virtual reality cognitive robots for effective AI systems

Application of AI in the Teaching and Learning of English as a Foreign Language (EFL) Baba Khouya, Youssef, Ismaili Alaoui, Abderrahmane, 2025-05-28 The application of artificial intelligence AI in the teaching and learning of English as a Foreign Language EFL transforms traditional educational practices by offering more personalized efficient and interactive learning experiences AI powered tools enable learners to receive instant feedback engage in conversational practice and tailor content to individual learning styles AI facilitates adaptive learning platforms that analyze students progress and adjust difficulty and content type For educators AI can assist in automating administrative tasks assessing student performance and identifying areas for learner support Further research may enable more data informed and responsive teaching strategies in EFL contexts Application of AI in the Teaching and Learning of English as a Foreign Language EFL explores the application of AI in the teaching and learning of EFL Through an applied linguistics lens this publication examines how AI technologies transform traditional EFL methodologies addressing the potential of AI to personalize learning optimize language assessment and facilitate language acquisition while also tackling challenges ethical considerations and the need for interdisciplinary collaboration This book covers topics such as ethics and law lexicology and gamification and is a useful resource for educators linguists and language experts computer engineers academicians researchers and scientists

Future of Learning with Large Language Models Myint Swe Khine, László Bognár, Ernest Afari, 2025-11-19 The book covers theoretical foundations on how LLMs can enhance learning cognitive reinforcement improving learning efficiency and personalization in learning applications across the curriculum teacher training and support for LLM integration using in assessment and evaluation and measuring the impact and affordances of LLMs It acknowledges the challenges that come with integrating LLMs into education and will address the responsible development and deployment strategies to ensure that the models become powerful tools for good in the hands of educators It explores potential research directions such as the development of domain specific models and the creation of ethical frameworks for LLM use in education As education enters

an era of AI enablement this visionary book equips teachers administrators technologists and policymakers with an authoritative guide to harnessing the power of large language models Readers will discover how these advanced systems can expand access to quality education tailor learning experiences and nurture the innovators and critical thinkers of tomorrow and glimpse into the future of learning and education with LLMs

Empowering K-12 Education with AI Thomas K. F. Chiu,2024-12-17 Thomas Chiu s book is one of the first to look at the impacts of artificial intelligence AI on K 12 education in two areas AI education and AI in education AI education refers to teaching AI and AI in education refers to using AI to support learning and teaching Chiu examines the opportunities and challenges of these impacts for teachers and students proposes a framework and a set of principles for the two areas with examples and suggests learning outcomes AI in K 12 education is one of the most important global strategic initiatives since it has made and continues to make impacts on education and the job market Including AI technology and topics in K 12 education not only helps children understand what AI technologies are and how they work but also inspires future workplace readiness and potential AI researchers ethical designers and software developers However educators and AI experts in general realize that planning AI related education is very challenging It involves integrating the topics or technologies into the curriculum necessitating teacher development to address the gaps in knowledge addressing educational inequity and securing equipment and resources Understanding student and teacher opportunities and challenges is crucial This book is an essential and thought provoking read for researchers teacher educators and school teachers and leaders who wish to embrace AI to prepare K 12 students for their future education and the workforce
