ciencias sociales la obra se distancia en primer lugar de toda esencialización de los colectivos religiosos de toda reificación de la cual serían deducidas tanto la uniformización como la estandarización de las identidades y los comportamientos. Lejos de establecer el estudio de lo religioso como una rama insular y ultraespecializada de las ciencias sociales dotada de sus propias categorías nativas se reconecta con la exigencia pionera de la sociología de tomar en cuenta la complejidad de las estructuras no evidentes de los mundos religiosos y la fluidez de los procesos de producción, reproducción y transformación de esas estructuras. En segundo lugar al colocar el acento en los procedimientos de clasificación e inclasificación que han organizado y continúan organizando los mundos religiosos. Algranti y Setton se entregan a una reflexión metodológica y epistemológica general de cabal importancia. Desde que Henri Poincaré estableció en *El valor de la ciencia* (1905) que la ciencia es solo una clasificación, autores tan diversos como Claude Lévi-Strauss, Jack Goody o incluso Michel Foucault que en *Las palabras y las cosas* consagra un capítulo entero al acto de clasificar, han sealado esta identidad constitutiva entre ciencia y clasificación. Como forma de síntesis para captar lo real, la clasificación no solamente es el resultado de una exigencia de puesta en visibilidad sino que participa igualmente en su construcción. Por su valiosa contribución al estudio de los mundos religiosos el libro de Algranti y Setton se impone como una referencia insoslayable.

Continuidad, 1983. **Islam y judaísmo contemporáneo en América Latina** Isaac Caro, 2006-06-06. Este libro estudia las distintas comunidades tanto judías como islámicas existentes en América Latina concentrándose en los casos de Argentina, Brasil y Chile desde 1991 hasta 2004. Busca establecer su rol y participación en la región en el marco de los procesos de globalización política, económica, social, cultural y de reconfiguración de identidades culturales. También se analiza su forma de inserción en las respectivas sociedades nacionales en cuanto actores internacionales no estatales lo que implica determinar los rasgos principales de las relaciones entre las comunidades estudiadas y los países o territorios de origen.
