**The Grammar of Chinese Characters** James Myers, 2019-04-16 Anybody who reads or writes Chinese characters knows that they obey a grammar of sorts though numerous they are built out of a much smaller set of constituents often interpretable in meaning or pronunciation that are themselves built out of an even smaller set of strokes This book goes far beyond these basic facts to show that Chinese characters truly have a productive and psychologically real lexical grammar of the same sort seen in spoken and signed languages with non trivial analogs of morphology the combination of potentially interpretable constituents phonology formal regularities without implications for interpretation and phonetics articulatory and perceptual constraints Evidence comes from a wide variety of sources from quantitative corpus analyses to experiments on character reading writing and learning The grammatical approach helps capture how character constituents combine as they do how strokes systematically vary in different environments how character form evolved from ancient times to the modern simplified system and how readers and writers are able to process or learn even entirely novel characters This book not only provides tools for exploring the full richness of Chinese orthography but also offers new ways of thinking about the most fundamental question in linguistic theory what is grammar

**Chinese Narratology II** Yang Yi, 2023-11-30 As the second volume of a two-volume set on Chinese narratology, this title investigates the quintessential characteristics of the Chinese narrative style with a focus on image and perspective. The first chapter introduces two opposing concepts of perspective: focalization and blind spot, to connect perspective with traditional aesthetics, highlighting the mutual relation of the nonexistent and the existent. The author believes that both the narrator and perspective are central to the narrative forms and strategies adopted by Chinese writers, and that study of the narrator and perspective is integral to understanding the cultural, aesthetic, and philosophical connotations of the narrative text and the spiritual world of the author. Drawing on perceptual phenomenology, the chapter on image broadens the extant knowledge of image and points out that image narration is unique to Chinese narratology and central to Chinese aesthetics. The final chapter illustrates the achievements of influential critics of classical Chinese novels, proving that these critics have contributed to the canonization of the genuine masterpieces of Chinese narrative literature. The book is a must-read for scholars and students interested in narrative theory, Chinese culture, and literature, and dialogue between Chinese and Western narratological studies.
