Designing Social Innovation for Sustainable Livelihoods Gavin Brett Melles, 2022-02-14 This volume discusses how design broadly understood as design of business policy product system etc can produce socially responsible innovations with livelihoods consequences Sustainable Livelihoods Framework SLF is a robust framework for analysing and measuring social impact for excluded populations and groups This is illustrated with case studies from India Sri Lanka Bangladesh Nepal by discussing how initiatives concerned with design in the broad sense have the potential to create sustainable livelihoods This volume will be of interest to scholars and practitioners in Sustainable Development and Design *Proceedings of the FAO Global Conference on Sustainable Agricultural Mechanization* Telemans, B. (ed.), Aschauer, N. (ed.), Kienzle, J. (ed.), Xia, J. (ed.), 2024-06-05 The Global Conference on Sustainable Agricultural Mechanization GAMC organized by FAO from 27 to 29 September 2023 provided a neutral platform for global stakeholders to discuss sustainable agricultural mechanization for agrifood systems transformation The conference covered various themes like crop production post harvest and agroprocessing climate change and resilience digitalization and automation supply chain and standards models and multistakeholder engagement and creating an enabling environment The proceedings feature abstracts of speeches and presentations and culminate in a compelling call to action to guide future efforts for promoting sustainable agricultural mechanization towards 2030 and beyond [Agricultural mechanization](#) Food and Agriculture Organization of the United Nations, 2018-07-25 This paper is specifically about agricultural mechanisation the opportunities provided by mechanisation for intensifying production in a sustainable manner in value addition and agri food value chain development as well as the inherent opportunities implied for improved local economies and livelihoods The establishment of viable business enterprises agro processors transport services and so forth as a result of increased agricultural mechanisation in rural areas is crucial to creating employment and income opportunities and thereby enhancing the demand for farm produce Mechanisation plays a key role in enabling the growth of commercial agri food systems and the efficiency of post harvest handling processing and marketing operations and as such can be a major determinant in the availability and accessibility of food the food prices paid by urban and rural poor as well as contributing to increased household food security *Agricultural mechanization policy options in Rwanda* Takeshima, Hiroyuki, Benimana, Gilberthe, Spielman, David J., Warner, James, 2024-05-13 This paper summarizes general demand and supply side issues for agricultural mechanization based on recent studies that focus on experiences and evidence from both Africa and Asia The paper provides typologies of agricultural mechanization in Rwanda along with policy options within the context of its current mechanization support strategies Provincial variations in agroecology and cropping systems irrigated rainfed systems farm size and labor use intensity among other factors characterize the key types of mechanization use in Rwanda Support for mechanization in Rwanda can be broadly tailored to a irrigated medium scale farmers in the Eastern province and Kigali b rainfed medium scale farmers in the Eastern and

Southern provinces c rainfed small scale highland farmers in the Northern province and d irrigated small scale farmers in the Western province Recent experiences in other countries with rugged terrain and smallholder farming systems similar to Rwanda suggest that significant growth in the use of tractors is possible in the medium term among smallholders cultivating rainfed maize and legumes in addition to irrigated rice However farm wages may still be too low in Rwanda and tractor hiring fees may still be too high to induce a shift to mechanization in the short term Therefore it may be advisable for policy support for mechanization to focus on improving the understanding of mechanization needs among each type of farmers identified knowledge of suitable machines and required skills for their operations and maintenance Such efforts should also balance the need to develop competitive markets and supply networks for promising machines parts and repair services at a viable and integrated market scale *Handbook of Agricultural Economics* Robert E. Evenson, Prabhu Pingali, 2007-06-28

De Gruyter Handbook of Poverty, Disadvantage and Entrepreneurship Michael H. Morris, Susana C. Santos, 2024-12-16 Is entrepreneurship a pathway out of poverty Does creating a business represent a means for improving one's life circumstances Surprisingly little is known about ventures started by those in circumstances of poverty This pioneering handbook integrates diverse perspectives from around the world regarding the poverty and entrepreneurship interface While the tendency among many scholars economic developers and policymakers is to downplay these ventures

arguing they are largely inefficient marginal enterprises that create little innovation and few jobs the chapters in this handbook demonstrate their significant contributions and encourage societies to invest in their development The authors explore a range of factors affecting the ability of the poor to create enterprises that contribute to their well being including the role played by personal capabilities education family support and faith availability of microfinance technology supportive community ecosystems and a munificent institutional environment By shedding light on issues that can help nations realize the potential of these ventures this volume demonstrates how entrepreneurship can serve as a source of empowerment while providing direction regarding ways to surmount the obstacles that stand in the way

Biological Approaches to Regenerative Soil Systems Norman Uphoff,Janice Thies,2023-10-27 Agriculture in the 21st century will need considerable modification to remain both productive and sustainable Greater production is needed to meet the needs of our still growing populations and to combat hunger and poverty Declines in soil health and the pollution of water sources are making many of our production systems less tenable These adverse trends are exacerbated more and more by the impacts of climate change There are fortunately alternative methods available for agricultural practice that can countervail these constraints *Biological Approaches to Regenerative Soil Systems* brings together the work of both researchers and practitioners to map out better approaches to contemporary agriculture that draw upon both old and new knowledge It presents the science that underlies more biologically driven strategies as well as contemporary innovative experiences in diverse parts of the world Both accepted research and these varied experiences encourage confidence that these approaches not relying primarily on the introduction of new varieties and on exogenous inputs can succeed This book updates and revises

a preceding volume *Biological Approaches to Sustainable Soil Systems* published by CRC Press in 2006 So much has been learned and done on this subject in the past decade and a half that a second edition was warranted For instance the first edition was published knowledge about plant soil microbiomes which are a frequent focus in this book has mushroomed Because sustainability is a broad term and an end state the editors preferred to assemble expertise regarding regenerative agriculture which is concerned with the means for achieving sustainability The concept of regenerative soil systems entities that are more complex and multifaceted than soil alone also incorporates a concern with having more resilient agricultural systems ones that are better able to cope with the multiple stresses of climate change that are foreseen for the decades ahead The book s chapters representing a wide range of disciplines were contributed by 84 scientists and practitioners from 20 countries Although they come from persons with in depth knowledge of their respective fields the chapters are written to be accessible to readers who are not trained in the specialized subjects Taken together the chapters provide students researchers practitioners planners and policy makers with a comprehensive understanding of both the science and the steps needed to regenerate and sustain soil systems around the world for the long term benefit of humankind and the environment

Save and Grow in practice: maize, rice, wheat Food and Agriculture Organization of the United Nations,2018-06-21 FAO s best selling 2011 publication *Save and Grow* proposed a new paradigm of agriculture one that is both highly productive and environmentally sustainable This new book looks at the application of *Save and Grow* practices and technologies to production of the world s key food security crops maize rice and wheat With examples drawn from developing countries worldwide it shows how eco friendly farming systems are helping smallholder producers to boost cereal yields improve their incomes and livelihoods conserve natural resources reduce negative impacts on the environment and build resilience to climate change The book will be a valuable reference for policymakers and development practitioners guiding the transition to sustainable food and agriculture

Farm Power and Mechanization for Small Farms in Sub-Saharan Africa B. G. Sims,Josef Kienzle,2006 Many previous publications on farm mechanization draught animal power hand tool technology etc have tended to be narrowly focused The topic of farm power and mechanization also tended to be separated from the actual process of growing crops This manual looks at putting the different sources of farm power mechanization machines equipment and tools in a much broader context Farm power requirements need to be viewed with reference to rural livelihoods and to farming systems as well as to the critical area of labour saving in HIV AIDS hit populations No one particular type of technology is advocated
