Stephanson,L. Jing,C.-F. Tsang,1997-02-10 This work brings together the results information and data that emerged from an international cooperative project DECOVALEX 1992 1995 This project was concerned with the mathematical and experimental studies of coupled thermo T hydro H mechanical M processes in fractured media related to radioactive waste disposal The book presents for the first time the systematic formulation of mathematical models of the coupled T H M processes of fractured media their validation against theoretical bench mark tests and experimental studies at both laboratory and field scales It also presents for the first time a comprehensive analysis of continuum and discrete approaches to the study of the problems of as well as a complete description of the computer codes applied to the studies The first two chapters provide a conceptual introduction to the

coupled T H M processes in fractured media and the DECOVALEX project The next seven chapters give a state of the art survey of the constitutive models of rock fractures and formulation of coupled T H M phenomena with continuum and discontinuum approaches and associated numerical methods A study on the three generic Bench Mark Test problems and six Test Case problems of laboratory and field experiments are reported in chapters 10 to 18 Chapter 19 contains lessons learned during the project The research contained in this book will be valuable for designers practising engineers and national waste management officials who are concerned with planning design and performance and safety assessments of radioactive waste repositories Researchers and postgraduate students working in this field will also find the book of particular relevance Investigation of Toner Adhesion in the Electrophotographic Process Hongben Zhou,2008
