Solutions! ,2003 **Subject Guide to Books in Print** ,1997 **A New Blueprint for Brain Health** Sanjeev Sridharan, Jordan Antflick, Kaela Scott, April Nakaima, 2025-12-02 This open access book presents an integrative vision to achieve better brain health Across the globe is a growing awareness of the impact of neurological conditions and mental health on wellbeing Also as populations age the number of people impacted by brain health conditions also grows shining a light on the need for brain health solutions that are sustainable Although the knowledge of what is working for a variety of brain health conditions continues to expand we need to realize that not all solutions will come from medical research What is needed to address brain health in a more sustainable way is a better understanding of the care that community provides and how a vision of better brain health will be found by deepening our understanding of the role of community and elevating the value of their contributions Community organizations provide frontline care and have a tangible understanding of the needs that accompany the populations above This means they are well equipped to provide local and accessible care Community is a place in which brain health solutions can be delivered in a sustainable effective efficient equitable and person centered way As such the knowledge community organizations can contribute to the bigger picture of health care is important This project responds to the need to better understand community care by highlighting how the role of evaluative thinking in the community sector can help us generate evidence to navigate towards better brain health futures By first recognizing and then supporting community led care we can expand how we view and receive care Along these lines the book moves from a

view of healthcare as being only delivered in hospitals and clinics to recognizing the continuum of care and integration of healthcare options It provides a space for stories of health care solutions that indeed have connected health to the social and the community sectors By exploring community interventions that have been integrated with biomedical neuroscientific solutions we will learn how integrated sustainable solutions can be created The role of evaluation in helping facilitate the creation of such solutions also will be explored This project is a partnership between the Ontario Brain Institute and the Evaluation Centre for Complex Health Interventions and reflects our collective learnings from our work in developmental evaluation and brain health Digital Transformation of Malaysian Small and Medium Enterprises Farzana Parveen
