The province's variety of geological features with its major lakes, rivers, tributaries, and watersheds is due in large part to its history as the basin for Glacial Lake Agassiz. This combined with its access to the waters of Hudson Bay and large American river systems has provided habitat for a wide diversity of freshwater fish. Species from lampreys to goldeye, catfish to perch, bigmouth bass to slimy sculpin swim in waters from arctic rivers in the north to Red River tributaries and down to the Mississippi in the south. *Freshwater Fishes of Manitoba* is a comprehensive user friendly guide. Each species is accurately depicted in detailed colour photographs and accompanying map with descriptions of physical characteristics, spawning and feeding habits, distribution, habitat, ecological role, and economic importance. The guide also includes an extensive glossary, keys to identifying the families, species, and subspecies, and information on documentation and preservation of specimens. *Freshwater Fishes of Manitoba* is not only the definitive guide to these fishes of Manitoba, it is also accessible and reliable for a range of users from general fishers to professional fish biologists. **Miscellaneous Publication** Michigan Institute for Fisheries Research, Ann Arbor, 1950 **Investigational Report**, 1988 **Miscellaneous Publications** Michigan. Physicochemical data include seasonal vertical and horizontal variations in temperatures water movements dissolved oxygen carbon dioxide phenolphthalein and methyl orange alkalinity pH chlorides and turbidity The species composition seasonal abundance and distribution of micro and macroplankton are discussed in detail Special consideration is given to the influence of polluted river waters which flow into the lake It is concluded that the lake is remarkably free from chemical and sewage pollution Evidence of pollution farther than 1 mile from possible sources was detected at only 2 stations The nutrient level of Lake Erie is high and the lake should support large fish populations *Miscellaneous Publication - Institute for Fisheries Research* Institute for Fisheries Research, Ann Arbor, 1944 **Special Scientific Report** ,1959
