Engineering in the XXI Century Lessons learned and future challenges presents the proceedings of the XVI Pan American Conference on Soil Mechanics and Geotechnical Engineering XVI PCSMGE held in Cancun Mexico from 17 20 November 2019 Of the 393 full papers submitted 335 were accepted for publication after peer review They are included here organized into 19 technical sessions and cover a wide range of themes related to geotechnical engineering in the 21st century Topics covered include laboratory and in situ testing analytical and physical modeling in geotechnics numerical modeling in geotechnics unsaturated soils soft soils foundations and retaining structures excavations and tunnels offshore geotechnics transportation in geotechnics natural hazards embankments and tailings dams soils dynamics and earthquake engineering ground improvement sustainability and geo environment preservation of historic sites forensics engineering rock mechanics education and energy geotechnics Providing a state of the art overview of research into innovative and challenging applications in the field the book will be of interest to all those working in soil mechanics and geotechnical engineering In this proceedings 58% of the contributions are in English and 42% of the contributions are in Spanish or Portuguese

Geotechnical Related Development and Implementation of Load and Resistance Factor Design (LRFD) Methods George G. Goble, 1999 This synthesis report will be of interest to geotechnical structural and bridge engineers especially those involved in the development and implementation of the geotechnical aspects of the AASHTO Bridge Code The synthesis documents a review of geotechnical related LRFD specifications and their development worldwide to compare them with the current AASHTO LRFD Bridge Code Design procedures for foundations earth retaining structures and culverts are summarized and compared with the methods specified by the AASHTO code This TRB report provides information designed to assist engineers in implementing the geotechnical features of LRFD methods Information for the synthesis was collected by surveying U S and Canadian transportation agencies and by conducting a literature search using domestic and international sources Interviews were also conducted with selected international experts The limited available experience in the United States and information from international practice are discussed to understand the problems that have arisen in order that solutions may be found Based on the studies reported here suggestions for improving the code are identified
