Kaliraj,T. Devi,2022-12-27 The transformative digital technologies developed for Industry 4 0 are proving to be disruptive change drivers in higher education Industry 4 0 technologies are forming the basis of Education 4 0 Industry 4 0 Technologies for Education Transformative Technologies and Applications examines state of the art tools and technologies that comprise Education 4 0

Higher education professionals can turn to this book to guide curriculum development aimed at helping produce the workforce for Industry 4.0 The book discusses the tools and technologies required to make Education 4.0 a reality It covers online content creation learning management systems and tools for teaching learning and evaluating Also covered are disciplines that are being transformed by Industry 4.0 and form the core of Education 4.0 curricula These disciplines include social work finance medicine and healthcare Mobile technologies are critical components of Industry 4.0 as well as Education 4.0 The book looks at the roles of the Internet of Things IoT 5G and cloud applications in creating the Education 4.0 environment Highlights of the book include Technological innovations for virtual classrooms to empower students Emerging technological advancements for educational institutions Online content creation tools Moodle as a teaching learning and evaluation tool Gamification in higher education A design thinking approach to developing curriculum in Education 4.0 Industry 4.0 for Service 4.0 and Research 4.0 as a framework for higher education institutions Eye tracking technology for Education 4.0 The challenges and issues of the Internet of Things IoT in teaching and learning

Introduction to Intelligent Surveillance Wei Qi Yan, 2017-07-10 This accessible textbook reference reviews the fundamental concepts and practical issues involved in designing digital surveillance systems that fully exploit the power of intelligent computing techniques The book presents comprehensive coverage of all aspects of such systems from camera calibration and data capture to the secure transmission of surveillance data In addition to the detection and recognition of objects and biometric features the text also examines the automated observation of surveillance events and how this can be enhanced through the use of deep learning methods and supercomputing technology This updated new edition features extended coverage on face detection pedestrian detection and privacy preservation for intelligent surveillance Topics and features contains review questions and exercises in every chapter together with a glossary describes the essentials of implementing an intelligent surveillance system and analyzing surveillance data including a range of biometric characteristics examines the importance of network security and digital forensics in the communication of surveillance data as well as issues of privacy and ethics discusses the Viola Jones object detection method and the HOG algorithm for pedestrian and human behavior recognition reviews the use of artificial intelligence for automated monitoring of surveillance events and decision making approaches to determine the need for human intervention presents a case study on a system that triggers an alarm when a vehicle fails to stop at a red light and identifies the vehicle s license plate number investigates the use of cutting edge supercomputing technologies for digital surveillance such as FPGA GPU and parallel computing This concise classroom tested textbook is ideal for undergraduate and postgraduate level courses on intelligent surveillance Researchers interested in entering this area will also find the book suitable as a helpful self study reference

Cloud Computing and Virtualization Technologies in Libraries Dhamdhare, Sangeeta N., 2013-10-31 The emergence of open access web technology and e publishing has slowly transformed modern libraries into digital libraries With this variety of technologies

utilized cloud computing and virtual technology has become an advantage for libraries to provide a single efficient system that saves money and time Cloud Computing and Virtualization Technologies in Libraries highlights the concerns and limitations that need addressed in order to optimize the benefits of cloud computing to the virtualization of libraries Focusing on the latest innovations and technological advancements this book is essential for professionals students and researchers interested in cloud library management and development in different types of information environments

The Secure Information Society Jörg Krüger, Bertram Nickolay, Sandro Gaycken, 2012-11-07 In our modern information societies we not only use and welcome computers we are highly dependent upon them There is a downside of this kind of progress however Computers are not 100% reliable They are insecure They are vulnerable to attackers They can either be attacked directly to disrupt their services or they can be abused in clever ways to do the bidding of an attacker as a dysfunctional user Decision makers and experts alike always struggle with the amount of interdisciplinary knowledge needed to understand the nuts and bolts of modern information societies and their relation to security the implications of technological or political progress or the lack thereof This holds in particular for new challenges to come These are harder to understand and to categorize their development is difficult to predict To mitigate this problem and to enable more foresight The Secure Information Society provides an interdisciplinary spotlight onto some new and unfolding aspects of the uneasy relationship between information technology and information society to aid the dialogue not only in its current and ongoing struggle but to anticipate the future in time and prepare perspectives for the challenges ahead
