publication of the official Honda Factory Workshop Manual specific to the 1962-1969 n10 50cc Sport Cub series of motorcycles. This manual includes all of the data that you would expect from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components. It also includes a comprehensive troubleshooting section plus tables of technical data, tolerances, and fits, making it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 55 illustrations, and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is at times a little quirky, but the illustrations make up for any difficulty in understanding what needs to be done. There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels, and brakes, front forks, frame, and carburetor, plus a detailed electrical service section. This is a must-have reference for any Honda enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic motorcycles. Out of print and unavailable for many years, this book is highly sought after on the secondary market, and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide. **Honda CBR125R** Matthew Coombs, 2007 **Honda Motorcycles**
