Georg F. Striedter,Theodore H. Bullock,Todd M. Preuss,John Rubenstein,Leah A. Krubitzer,2016-11-23 Evolution of Nervous
Systems Second Edition Four Volume Set is a unique major reference which offers the gold standard for those interested
both in evolution and nervous systems All biology only makes sense when seen in the light of evolution and this is especially
true for the nervous system All animals have nervous systems that mediate their behaviors many of them species specific yet
these nervous systems all evolved from the simple nervous system of a common ancestor To understand these nervous
systems we need to know how they vary and how this variation emerged in evolution In the first edition of this important
reference work over 100 distinguished neuroscientists assembled the current state of the art knowledge on how nervous
systems have evolved throughout the animal kingdom This second edition remains rich in detail and broad in scope outlining
the changes in brain and nervous system organization that occurred from the first invertebrates and vertebrates to present
day fishes reptiles birds mammals and especially primates including humans The book also includes wholly new content fully
updating the chapters in the previous edition and offering brand new content on current developments in the field Each of
the volumes has been carefully restructured to offer expanded coverage of non mammalian taxa mammals primates and the
human nervous system The basic principles of brain evolution are discussed as are mechanisms of change The reader can
select from chapters on highly specific topics or those that provide an overview of current thinking and approaches making
this an indispensable work for students and researchers alike Presents a broad range of topics ranging from genetic control
of development in invertebrates to human cognition offering a one stop resource for the evolution of nervous systems
throughout the animal kingdom Incorporates the expertise of over 100 outstanding investigators who provide their
conclusions in the context of the latest experimental results Presents areas of disagreement and consensus views that
provide a holistic view of the subjects under discussion *Organizational Behavior* John Newstrom,2006
