Advancing forest-based carbon trading in Nepal: Policy challenges and agroforestry opportunities Chaudhary, Arbind, Babu, Suresh Chandra, 2025-08-04 Nepal remains among the countries most vulnerable to climate related disasters Although several national policy documents have emphasized the urgency of mitigation and adaptation climate action remains fragmented and significantly underfunded Nepal's unique geography spanning the Himalayas mid hills and Tarai plains together with recent decentralization reforms offers a favorable context for implementing localized context specific solutions to climate threats However the lack of consistent policy frameworks weak institutional mechanisms limited investment and fragmented governance across all levels of government continue to impede progress In this policy note we use carbon trading in the forestry sector as a case study to illustrate broader policy challenges and opportunities in Nepal and other Global South countries Trading is a market based mechanism that incentivizes the offset of greenhouse gas GHG emissions through credits for CO₂ sequestration Nepal has adopted this approach in line with international agreements such as the Kyoto Protocol and the Paris Agreement As one of the major strategies the country has sought to capitalize on its forest resources to generate carbon credits and attract international climate finance

Traditional knowledge, perceptions and forest conditions in a Dayak Mentebah community, West Kalimantan, Indonesia Edith Weihreter, 2014-12-19 This study aims to introduce the natural resource uses of Dayak Mentebah people of the village Nanga Dua West Kalimantan It is part of the project CoLUPSIA that focuses on reinforcing small stakeholder's rights Furthermore ecological data are collected to support

the protection of Indonesia's species rich and vulnerable tropical forests threatened through high deforestation rates. The local people's perceptions about their environment and land uses were assessed using participatory survey techniques: focus group discussions, scoring exercises, free lists of species, and participatory mapping. To further record the traditional practices, a survey was conducted on medicinal plants. The ecological assessment was done through survey plots in different land use units where tree diversity and diameter at breast height was measured. The inhabitants of Nanga Dua are dependent upon forest products for food material for construction, basketry, etc. Medicinal plants are an integral part of the health care system. The traditional shifting cultivation creates a diverse and mosaic-like patchwork of various types of forests having different successional stages. Tree diversity in the land use units was generally high with the primary forest in immediate proximity acting as a tree species reservoir.

Kay,2005 Dentistry is not only about understanding the causes of oral disease and having the technical expertise to treat them Patients frequently challenge practitioners with ethical dilemmas psychological and social problems health and welfare difficulties and personal demands This book covers the case histories of six individuals and the dental problems they encounter through their lives Each case is loosely based on a real individual to allow the senior dentistry student to develop an understanding of the many issues they may face in daily clinical practice Although all the patients featured in the book have problems related to oral and dental diseases their successful long term management requires both a profound awareness of modern treatment options and a broad knowledge of law applied to dentistry the ethics of dental care plus the psychology and sociology of disease and health related behaviour Each chapter describes a hypothetical patient and how he or she presented or might present to a general dental practitioner The various treatment options which could be chosen by the patient s practitioner are included and the advantages and disadvantages of the various treatment plans are described The medium and long term outcomes for that patient in terms of their oral well being are then covered so that the reader can appreciate how even seemingly inconsequential treatment decisions can impact on a person many years after their encounter with the dentist This longitudinal approach will help the reader to view dealing with patients problems as a lifetime s work rather than as a set of one off interventions □□□□□□ ,2006 *Journal of Engineering Education* ,2006 **Geology of the Pilot Mountains and Vicinity, Mineral County, Nevada** Richard Leroy Nielsen,1964 **Library & Information Science Abstracts** ,2005 **Agricultural Situation in India** ,2012 **Index to IEEE Publications** Institute of Electrical and Electronics Engineers,1998 Issues for 1973 cover the entire IEEE technical literature **Public health reports** ,2006
