IEEE Std 1313-2012
IEEE Recommended Practice for
Electric Power Distribution for
Industrial Plants
This standard is the result of a project of the IEEE Power Engineering Society (PES) Electric Power Distribution Committee (EPDC). The project was initiated in 1998 and was completed in 2012. The standard is a revision of IEEE Std 1313-1998, IEEE Recommended Practice for Electric Power Distribution for Industrial Plants, which was approved by the IEEE PES Council in 1998. The new standard includes updates to reflect changes in technology and industry practices. The standard is intended for use by electrical engineers, designers, and installers of industrial power distribution systems. It provides a comprehensive set of guidelines for the design, installation, and operation of industrial power distribution systems. The standard covers a wide range of topics, including system design, equipment selection, safety, and maintenance. It is a valuable resource for anyone involved in the design and operation of industrial power distribution systems.
