

CONTEXT CLUES

Context clues are hints found within a sentence, paragraph, or passage that a reader can use to understand the meanings of new or unfamiliar words.

Learning the meaning of a word through its use in a sentence or paragraph is the most practical way to build vocabulary, since a dictionary is not always available when a reader encounters an unknown word.

A reader must be aware that many words have several possible meanings. Only by using context or the definitions in which a word is used can the reader decide upon an appropriate definition for the context.

A reader should rely on context clues only when a definition is provided, or when only a general sense of the meaning is needed for the reader's purposes. Context clues should not be relied upon as a primary means of learning, since clues suggest several possible definitions, when nearby words are unfamiliar, and when the unknown word is a common one that will be needed again in other cases, a dictionary should be consulted.

There are several different types of context clues. Some of them are:

I. DEFINITION / DESCRIPTION CLUE

The new term may be formally defined or explained or paraphrased right before within the sentence or in the following sentence. Clues to definition include "that is," "means," "defines," and "pertains."

Examples:

a. The **connotation**, that is, the abstract idea associated with highlighting for me,

"Mysticism (the appearance)" is the definition of "connotation."

b. **Etymology**, or connection with a language, has become a common practice

The context before and after "connection with a language" point out the definition of "Etymology."

c. The **deckle** - a short-circuited clay pipe - is found in Irish folk tales.

The **deckle** coming off "a short-circuited clay pipe" points out the definition of "deckle."

II. EXAMPLE CLUES

Sometimes when a reader finds a new word, an example might be found nearby that helps to explain its meaning. Words like including, such as, and for example, point out example clues.

Examples:

a. **Counting** numbers, such as thousands, millions, and tens, lay in the corner parts of the system.

"Counting" abstracts refers to this.

b. **Cultural** traditions, including the new ones, and stars, have blossomed from through the system.

"Cultural" objects are there in the sky of systems.
